The Language of the Body Alexander Lowen,2012-12-18 The Language of the Body originally published as Physical Dynamics of Character Structure brilliantly describes how personality is expressed in the form and function of the body The body is the key to understanding behavior and working with the body is the key to psychological health The Language of the Body outlines the foundations of character structure schizoid oral masochistic hysteric and phallic narcissistic personality types Dr Lowen examines the relationship between psychoanalytic theory and body therapy Art, Myth and Deviance Shlomo Giora Shoham,2008-12-18 Myths have long been considered the prime linkage between nature and culture but we hold that they are more than this The mythogene which is our conceptualization of a connecting structure links subject and object history and transcendence but above all is the blueprint for creativity The volume deals therefore with the innovative conception of the author as to the process of creativity Van Gogh had a revelation as to how the whirling cypresses and dancing stars would look at night These structures which contain a complementarity between his experiences and longings are then ingrained in the artistic medium Since his artistic efforts were authentic his ecstatic in the Greek sense state of mind extricated itself from diachronic history and soared onto synchronic eternity This is how we perceive his work as fresh exhilarating and meaningful as if painted today it is the communication within eternity of authentic art from artist to audience The volume also presents a classification of types of artists as related to their art and presents and innovative theory as to the link between madness and creativity

Companion for Introductory Psychology Jane S. Halonen, Cynthia Gray, 2001-03-30 This concise paperback helps develop students critical thinking skills through exercises keyed to the main topics in introductory psychology

Art, Crime and Madness Shlomo Giora Shoham, 2003-01-01 Art Crime and Madness explores the relationship between creative innovation deviance and morbidity To innovate one has to be able to view the medium and the object of creativity in a different hitherto unexplored manner The essence of art is creative innovation coupled with an ability in varying degrees to transcend the boundaries of consciousness But this ability is also the prerogative of the mentally deranged Likewise the criminal and the deviant are more likely to transcend normative barriers while creating hence the wide range of criminal and deviant behaviour in society Although the inverse hypothesis does not hold the mere existence of deviance or morbidity does not predispose the individual to creativity nevertheless criminal and mad behaviour are often very innovative This thesis is illustrated by historical case histories of creative deviance and genius madness and contemporary observations The painter Michelangelo Merisi Caravaggio killed a man while still a teenager and a second victim during a ball game In his lifetime he was considered degenerate but today he is considered the greatest painter of the Italian Settecento and his portrait adorns the Hundred Thousand Lira note Jean Genet the homosexual thief was born out of wedlock and as a teenager he transgressed almost all the paragraphs of the French criminal code But he became a famous French playwright the mouthpiece for criminals and deviants His plays built up a philosophical apology for the *raison d'être* of the criminal group

Postmodernism in Pieces Matthew Mullins, 2016-07-01 Postmodernism in Pieces performs a postmortem on what is perhaps the most contested paradigm in literary studies In the wake of a critical consensus proclaiming its death Matthew Mullins breaks postmodernism down into its most fundamental orthodoxies and reassembles it piece by piece in light of recent theoretical developments in Actor Network Theory object oriented philosophy new materialism and posthumanism In the last two decades postmodernism has collapsed under the weight of the very phenomena it set out to deconstruct language whiteness masculinity class the academy Recasting these categories as social constructs has done little to alleviate their material effects Through detailed analyses of everyday objects in novels by Leslie Marmon Silko Toni Morrison Jonathan Lethem John Barth David Foster Wallace Don DeLillo and Julia Alvarez Mullins argues that what makes fiction postmodern is its refusal to accept social explanations for problems facing a given culture and its tendency instead to examine everyday things and people as constituent pieces of larger networks The result is a new story of postmodernism one that reimagines postmodernism as a starting point for a new mode of literary history rather than a finish line for modernity

An Existentialist Theory of the Human Spirit (Volume 1) Shlomo Giora Shoham, 2020-07-22. This first volume examines how sexual mores and behavior, religious dogma and practice and artistic creativity and authenticity have influenced and been influenced by the existentialist thought of Kierkegaard, Heidegger, Sartre, Nietzsche, Husserl and Buber and the writings of Camus, Dostoevsky, Beckett, Kafka and Shestov. It compares the author's personality theory with those of Freud, Jung, Fairbairn, Karl Abraham and Melanie Klein and Buddhist, Gnostic, Christian and Muslim mysticism with Jewish Kabbalah. It explains society's harsh treatment of Carlo Gesualdo, Vincent van Gogh and Antonin Artaud and analyzes the existentialist approach to existence, absurdity, human dialogue and suicide. It will appeal to students and professionals in fields as diverse as philosophy, psychology, sociology, anthropology, religion, law, music, art, drama, literature and biology.

Evidential Decision Theory Arif Ahmed, 2021-10-21. Evidential Decision Theory is a radical theory of rational decision making. It recommends that instead of thinking about what your decisions cause, you should think about what they reveal. This Element explains in simple terms why thinking in this way makes a big difference and argues that doing so makes for better decisions. An appendix gives an intuitive explanation of the measure-theoretic foundations of Evidential Decision Theory.
