Organizing Life S Diversity:

Organizing Life Barbara J. McClure, 2025-11-18 The subject of leadership has been exploding in literature both academic and popular for decades This is in part because leadership both good and poor has a significant impact on people s lives The explosion of literature on leadership is also because effective leadership is a complex and difficult task that requires understanding the organization one is seeking to lead understanding its people understanding its mission and goals understanding one s self and others and understanding the dynamic relationships among all of these as they change over time Being an effective leader is not easy and it is easier to fail at it than it is to succeed No wonder there is such a long list of books designed to help leaders succeed it makes sense that the challenge to be effective in a role with such significant and important implications for all of us whether we have a formal leadership position or not would garner as much attention and sell as many pages as it does However though leadership gets a lot of attention organizations including religious organizations continue to fail A radical shift in how leadership is understood including its purpose its contexts and its practices is needed

The Diversity of Life Edward O. Wilson, 1992 View a collection of videos on Professor Wilson entitled On the Relation of Science and the Humanities In the Amazon Basin the greatest violence sometimes begins as a flicker of light beyond the horizon There in the perfect bowl of the night sky untouched by light from any human source a thunderstorm sends its premonitory signal and begins a slow journey to the observer who thinks the world is about to change Watching from the edge of the Brazilian rain forest witness to the sort of violence nature visits upon its creatures Edward O Wilson reflects on the crucible of evolution and so begins his remarkable account of how the living world became diverse and how humans are destroying that diversity Wilson internationally regarded as the dean of biodiversity studies conducts us on a tour through time traces the processes that create new species in bursts of adaptive radiation and points out the cataclysmic events that have disrupted evolution and diminished global diversity over the past 600 million years The five enormous natural blows to the planet such as meteorite strikes and climatic changes required 10 to 100 million years of evolutionary repair The sixth great spasm of extinction on earth caused this time entirely by humans may be the one that breaks the crucible of life Wilson identifies this crisis in countless ecosystems around the globe coral reefs grasslands rain forests and other natural habitats Drawing on a variety of examples such as the decline of bird populations in the United States the extinction of many species of freshwater fish in Africa and Asia and the rapid disappearance of flora and fauna as the rain forests are cut down he poignantly describes the death throes of the living world s diversity projected to decline as much as 20 percent by the year 2020 All evidence marshaled here resonates through Wilson s tightly reasoned call for a spirit of stewardship over the world s biological wealth He makes a plea for specific actions that will enhance rather than diminish not just diversity but the quality of life on earth Cutting through the tangle of environmental issues that often obscure the real concern Wilson maintains that the era of confrontation between forces for the preservation of nature and those for economic development is over he convincingly drives home the point that both aims can and must be integrated Unparalleled in its range and depth Wilson s masterwork is essential reading for those who care about preserving the world biological variety and ensuring our planet s health
