Instructions: Read the following passage about the concept of Ronald Reagan in world history. Then answer the questions on the information.

Ronald Wilson Reagan, the 40th President of the United States, was a transformative figure in American politics. Born in Illinois in 1911, his path to the presidency was unconventional. Initially a Hollywood actor and later the governor of California, Reagan's charisma and conservative ideology propelled him to national prominence. His presidency, spanning from 1981 to 1989, was marked by significant changes in both domestic and foreign policy.

On the domestic front, Reagan championed a policy known as "Reaganomics." This approach emphasized tax cuts, deregulation of industries, and reducing the size of government. Reagan believed that these policies would stimulate economic growth and reduce the role of government in people's lives. While the success of Reaganomics remains a subject of debate, it undoubtedly changed the trajectory of American economic policy.

Reagan took a hardline stance against the Soviet Union, terming it the "evil empire." He escalated the Cold War by increasing defense spending and pursuing the Strategic Defense Initiative (codenamed "Star Wars"). This assertive approach put pressure on the Soviet Union, which was already facing internal economic and political problems. Historians credit Reagan with playing a significant role in the eventual collapse of the Soviet Union.
