The Autocar, 1987

British Leyland James Taylor, 2018-03-26 In 1968 British Leyland brought together many of Britain's motor manufacturers with the intention of creating a robust unified group that could equal the strength of the big European conglomerates But this was not to be There have been many books about the politics and the business activities of British Leyland but British Leyland The Cars 1968 1986 looks exclusively at the cars that came from the company both the models it inherited and those it created The eighteen years of the corporation's existence saw a confusing multitude of different car types but this book resolves these confusions clarifying who built what and when The book takes 1986 as its cut off point because this was the year that

the old British Leyland ceased to exist and what was left of the car and light commercial business was renamed the Rover Group. The book includes Production histories and technical specifications of every major model. The special overseas models Appendices on engines code names and factories. Buying guidance on the models built in Britain. This is the most comprehensive book so far to focus on the cars from British Leyland between 1968-1986 and it provides an overview of each model's production history together with essential specification details. It is profusely illustrated with 178 colour and 63 b/w photographs. [Autocar & Motor](#), 1992-05. *Secret Rovers* James Taylor, Douglas Cooke, 2025-04-29. In the late 1960s the old Rover Company put everything it knew into a complex luxury saloon codenamed P8. At the same time it planned to branch out into a new sector of the market with a stunningly advanced mid-engined sports car prototype that became a formal project with the codename of P9. However, with the forced merger into British Leyland in 1968, Rover found itself squeezed between Triumph and Jaguar; neither marque welcomed the new sports car and Jaguar particularly did not welcome the new luxury saloon. Little by little, Rover's plans were undermined and in 1970 the sports car was killed off, followed by the luxury saloon which was axed in 1971, a mere six months before production was due to start. Just a year later, Rover itself ceased to exist as a separate business after a forced merger with Triumph. [Triumph Stag](#) Matthew Vale, 2014-05-31. The Triumph Stag was a two-door four-seat luxury touring car designed to be Triumph's flagship model for the 1970s. Styled by prolific designer Giovanni Michelotti and engineered by Harry Webster and Spen King, the Stag had no direct competitors throughout its production life and was the blueprint for the many four-seat convertibles on the market today. It was in production from 1970 through to 1977 but suffered from a lack of development and gained a reputation for engine problems caused by poor cooling. *Triumph Stag: An Enthusiast's Guide* explores the history, design and development of the car, taking a special look at the Stag's unique Triumph V8 engine and how Stag owners today have largely solved the cooling problems. It also covers owners' experiences, specialist modifications and improvements, and the car clubs that help the Stag remain one of the most popular classic cars in the UK. Superbly illustrated with 121 colour photographs. [The Enthusiasts' Guide to Buying a Classic British Sports Car](#) Peter Hingston, 2007. *Rover P5 and P5B* James Taylor, 2025-08-15. The car favoured by British Prime Ministers and the Queen. This is an essential guide to one of Britain's most respected cars. [British Car Advertising of the 1960s](#) Heon Stevenson, 2015-03-27. During the 1960s the automobile finally secured its position as an indispensable component of daily life in Britain. Car ownership more than doubled from approximately one car for every 10 people in 1960 to one car for every 4.8 people by 1970. Consumers no longer asked 'Do we need a car?' but 'What car shall we have?' This well-illustrated history analyzes how both domestic car manufacturers and importers advertised their products in this growing market, identifying trends and themes. Over 180 advertisement illustrations are included. [Motor Cycling and Motoring](#), 1986.
