Garrod, 2025-02-28 The aftermath of the 2008 financial crisis produced diverse solutions from nationalizing banks to increasing government spending and taxing capital However these proposals all faced significant obstacles in being realized Industry lobbying has since weakened reforms leading to ineffective policies raising the larger question of how to understand our current period of globalization where older strategies are ineffective but new solutions seem unattainable In *Royal Histories* Joel Z Garrod presents a historical analysis of the Royal Bank of Canada illustrating how Canadian capitalism and the Canadian banking industry have transformed as they have consolidated nationally and expanded abroad Emphasizing how national institutions and rules are increasingly becoming capabilities for transnational forms of capital accumulation the book draws on extensive primary and secondary sources to document the transformation of the assemblage of territory authority and rights that have supported the bank's activities over time Linking the bank's history to the policy regimes of the welfare state and neoliberalism Garrod contends that our present period of globalization is constituted by a novel organizing dynamic that severely limits the extent to which nation states can absorb capitalist crises or be a site of successful social reform Connecting the Canadian experience to the wider transformation of global capitalism *Royal Histories* illuminates the effects of globalization and the changing landscape of banking and finance

payment settlements or pay for delay agreements between originators and generic drug manufacturers create heated debates regarding the balance between competition and intellectual property law. These settlements touch upon sensitive issues such as timely generic entry and access to affordable pharmaceuticals and also the need to preserve innovation incentives for originators and to strengthen the pipeline of life saving pharmaceuticals. This book is one of the first to critically and comparatively analyse how such patent settlements and various other strategies employed by the pharmaceutical industry are scrutinised by both United States US and European courts and enforcement authorities and to discuss the applicable legal tests and the main criteria used for their assessment. The book's ultimate objective is to provide guidance to the pharmaceutical industry regarding the types of patent settlements strategies and conduct which may be problematic from US antitrust and European Union EU competition law perspectives and to assist practitioners in structuring settlements which are both efficient and compliant. To this end an exhaustive legal analysis of some of the most controversial issues regarding pharmaceutical patent settlements is provided including the lengthy split among US Circuit Courts on the issue of pay for delay settlements its resolution by the US Supreme Court in *FTC v Actavis* and subsequent jurisprudence the decision of *Lundbeck v Commission* by the European General Court and the *Servier* decision of the European Commission the *Roche Novartis* decision of the European Court of Justice and the most important decisions by National Competition Authorities on pharma patent settlements in the EU an overview of other types of strategies such as product hopping and product reformulations no authorised generic commitments problematic side deals mechanisms affecting generic substitution the rejection of the scope of the patent test in both the US and the EU and the balancing of patent law and antitrust law considerations in the prevailing applicable tests the benefits of settlements and the main criteria for assessing their legitimacy under US antitrust and EU competition law. The analysis provides concrete examples of both illegitimate and legitimate settlements and strategies emphasising on conduct that falls within a grey zone and on the circumstances and criteria under which such conduct could be deemed problematic from an antitrust perspective. This book will serve as a valuable guide for pharmaceutical companies wishing to minimise the risk of engaging in conduct that could potentially infringe US antitrust and EU competition law. It further aims to save courts and enforcement agencies and also practitioners and academics considerable time and resources by providing an exhaustive analysis of the relevant caselaw with the ultimate goal to increase legal certainty on the most controversial aspects of patent settlements in the pharmaceutical industry.

Opdahl, 2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia s foreign policy in the post Soviet region The book argues that the development of Russia s political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies roles in institutional development enabled them to influence foreign policy

formation and they became available as tools to implement foreign policy. The extent to which it happened for each company varied with their accessibility to the Russian state. Institutional development increased state capacity in a way that strengthened Russia's political regime. The book shows how the combined power of several companies in the gas, oil, electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position. In this way, Russia's energy resources were converted to regional influence. The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post-Soviet states. *The Report: Trinidad & Tobago 2015* Oxford Business Group, 2015-08-03. Meanwhile, the World Bank categorises T T as a high income non-OECD nation, while the World Economic Forum (WEF) in its reports on global competitiveness sees T T as an innovation-driven economy like the US or the UK. **Annual Report on the OECD Guidelines for Multinational Enterprises 2014 Responsible Business Conduct by Sector** OECD, 2014-12-18.
