**Earth Shashtra** Lion Dr Kiron, 2019-08-21 Roti Kapada Makaan Our very own Indian Dream falls short of its credibility in today's world where people spend incredible amount and time on temporary investments like food and fashion but have zero information and knowledge about land In the Indian scenario every other sector has websites advertising segments and crores spent on updating the trends in fashion vehicles and consumer goods but so little is said and done about the real estate sector In reality the truth is that every business and literally the whole world works on the financial viability of land property People have always been intimidated by land and the intricate yet simple intelligence that is required to be an

owner of a property This book aims to bridge the gap between the common man and the extensive knowledge available on the internet and in reality There are no wise investments only wise people who arm themselves with ample knowledge and push ahead by hard work These people take success and failure as two sides of a coin and forge pathways towards building a legacy of their own Your journey starts here My journey through the concrete jungle of realty for the past three decades has provided me with the knowledge that people dictate progress not vice versa Invest in land and it will definitely take care of you The most reliable and dependable part of humanity is the land we stand on Invest in it nurture it and make it an asset for the generations to come Lion Dr Kiron Builder Businessman Philanthropist Globetrotter [www.earthshasthra.com](http://www.earthshasthra.com)

**Embodied Carbon for Sustainable Building Conservation** Oriel Prizeman, 2025-06-30 This timely volume provides the latest research guidance examples and methods for understanding calculating leveraging and reducing embodied carbon in building conservation In the context of climate change and increasing energy costs imperatives to replace or substantially modify older and historic buildings are rapidly accelerating The idea that a new or replacement building will perform better overlooks the embodied carbon of that which it replaces In effect the pressures of one conservation agenda that of energy efficiency threaten to eclipse another that of heritage The embodied carbon of existing buildings must be addressed if calculations of operational energy use are to be properly balanced In this book an international and multi disciplinary group of authors offer perspectives on the influence and implementation of strategies to account for embodied carbon for the conservation of the historic environment Examples are deliberately diverse and extend beyond buildings to the valorisation of a heritage grassland landscape specifically because of its capacity to store carbon to the fundamental attributes of historic concrete and our responsibility to consider replacement with critical care This book inspires confidence in developing arguments by spreading examples globally and delivering plausible actual narratives alongside clear up to date guidance It brings together international standard setters with practitioners academics and advocates all clearly explained It also illustrates how embodied carbon played a pivotal role in seeking to determine the case of saving Marks and Spencer Oxford Street London from replacement This will be an essential resource for all building conservation and heritage practitioners including building surveyors architects conservators engineers conservation officers building archaeologists and consultants
