How Pictures Complete Us Paul Crowther, 2016-04-13 Despite the wonders of the digital world people still go in record numbers to view drawings and paintings in galleries Why What is the magic that pictures work on us This book provides a provocative explanation arguing that some pictures have special kinds of beauty and sublimity that offer aesthetic transcendence They take us imaginatively beyond our finite limits and even invoke a sense of the divine Such aesthetic transcendence forges a relationship with the ultimate and completes us psychologically Philosophers and theologians sometimes account for this as an effect of art but How Pictures Complete Us distinguishes itself by revealing how this experience is embodied in pictorial structures and styles Through detailed discussions of artworks from the Renaissance through postmodern times Paul Crowther reappraises the entire scope of beauty and the sublime in the context of both representational and abstract art offering unexpected insights into familiar phenomena such as ideal beauty pictorial perspective and what pictures are in the first place

Spatial Reasoning in the Early Years Brent Davis, Spatial Reasoning Study Group, 2015-04-17 Over the past several years spatial reasoning has gained renewed prominence among mathematics educators as spatial skills are proving to be not just essential to mathematical understanding but also strong predictors of future success beyond the classroom in fields such as science technology and engineering By exploring both primary and emergent dimensions Spatial Reasoning in the Early Years helps define the concept of spatial reasoning and provides compelling evidence of the need for a clear focus within early education specifically The authors review the research look across current theories and investigate implications for contemporary school mathematics pedagogy as they identify areas of inquiry necessary to bring a stronger spatial reasoning emphasis into the classroom The book contains many classroom or workshop based vignettes highlighting the complexity of spatial reasoning in educational practice providing an in depth analysis of spatial reasoning as it applies to classroom practice and offering new ways of framing lessons to help young students hone their spatial reasoning abilities The book concludes with a forward looking agenda that contributes to developing a greater understanding of the role spatial reasoning plays in educational contexts and beyond Supported by plentiful visual representations Spatial Reasoning in the Early Years skillfully integrates the conceptual and the concrete making this text a dynamic and accessible resource

Teaching Learners with Visual Impairment Maximus M.

Sefotho, Ronél Ferreira, 2020-12-31 This book *Teaching Learners with Visual Impairment* focuses on holistic support to learners with visual impairment in and beyond the classroom and school context.
