Regulating Content on Social Media Corinne Tan,2018-03-26 How are users influenced by social media platforms when they generate content and does this influence affect users compliance with copyright laws These are pressing questions in today s internet age and

Regulating Content on Social Media answers them by analysing how the behaviours of social media users are regulated from a copyright perspective Corinne Tan an internet governance specialist compares copyright laws on selected social media platforms namely Facebook Pinterest YouTube Twitter and Wikipedia with other regulatory factors such as the terms of service and the technological features of each platform This comparison enables her to explore how each platform affects the role copyright laws play in securing compliance from their users Through a case study detailing the content generative activities undertaken by a hypothetical user named Jane Doe as well as drawing from empirical studies the book argues that in spite of copyright s purported regulation of certain behaviours users are nudged by the social media platforms themselves to behave in ways that may be inconsistent with copyright laws Praise for Regulating Content on Social Media This book makes an important contribution to the field of social media and copyright It tackles the real issue of how social media is designed to encourage users to engage in generative practices in a sense effectively seducing users into practices that involve misuse or infringement of copyright whilst simultaneously normalising such practices Melissa de Zwart Dean of Law Adelaide Law School Australia This timely and accessible book examines the regulation of content generative activities across five popular social media platforms Facebook Pinterest YouTube Twitter and Wikipedia Its in depth critical and comparative analysis of the platforms growing efforts to align terms of service and technological features with copyright law should be of great interest to anyone studying the interplay of law and new media Peter K Yu Director of the Center for Law and Intellectual Property Texas A M University

Breaking Away Maurice E. Stucke, 2022 *Breaking Away* sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more competition necessarily promote our privacy and well being Second who owns the personal data and is that even the right question Third what are the policy implications if personal data is non rivalrous *Breaking Away* not only articulates the limitations of the current enforcement and regulatory approach but offers concrete proposals to promote competition without having to sacrifice our privacy This book explores how these platforms accumulated their power why the risks they pose are far greater than previously believed and why the tools need to be far more robust than what is being proposed Policymakers scholars and business owners managers and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information
