Between Caring & Counting Lindsay Kerr, 2006-01-01 One of the key planks of conservative Ontario premier Mike Harris's 1990s platform was education reform. Amid a sea of official reports, policy documents, and expert opinions on education, however, the voices of actual classroom teachers were difficult to find. This omission is redressed in Lindsay Kerr's *Between Caring & Counting*. Through a focus group of present day secondary school teachers in Toronto, Kerr delivers a passionate account of the unassailably negative changes affecting secondary education and teachers' work. From a critical feminist perspective and using institutional ethnography, Kerr situates the problem in education squarely as a conflict between an accounting logic and an ethic of care at the centre of education practice. She exposes paradoxes inherent in education reform, such as the increase of government control at the same time that government funding for education decreases. She also connects educational restructuring to changes in the power relations of gender, class, and race across the public education system. These local changes, she finds, do not reflect sound pedagogy but the imperatives of neoliberal globalization. Counteracting despair with hope, Kerr explores self-reflexive suggestions for teacher educators to exercise agency in their lives and to continue to work toward a just and equitable public education system.

Early Childhood Curricula and the De-pathologizing of Childhood Rachel Heydon,Luigi Iannacci,2009-04-11 Educators

have become increasingly interested in the diverse learning environments of young children and the ways in which children and childhood are positioned within those environments. The documentation and analysis of processes of pathologization and de pathologization in early childhood may provide scholars with the understanding needed to develop more responsive educational approaches. Early Childhood Curricula and the De pathologization of Childhood examines what is possible for young children when their education addresses their assets and is organized in ways that expand their identity options. Adopting an interdisciplinary approach, Rachel M. Heydon and Luigi Iannacci shed light on the ways in which joint notions of normality and abnormality are used to pathologize childhood. As teachers and educational researchers, they offer first-hand accounts of processes that take individual children and turn them into others who are seen as deficient or at risk. Through a variety of critical qualitative case studies that examine general literacy education, special education, early childhood education, and intergenerational learning environments, this book highlights the theoretical underpinnings of asset-oriented curricular practices and suggests what is possible for young children when their education begins from and cultivates their funds of knowledge. Written for those interested in improving the lives of children through interdisciplinary studies, this volume offers sustained theoretical engagement that will appeal to educators around the world.

Education in Nigeria Daniel A. Nomishan, 2023-05-25. This book, *Education in Nigeria: Reflections and Global Perspectives*, provides a broad overview of education in Nigeria. It recognizes the vital role education plays in the development of Nigeria and has attempted to air the concerns and call of the Nigerian public as well as educators for reform in the educational system in Nigeria. The book further recognizes that Nigerian education continues to be evolved first into a system of Western European education and then into a global system of education. It attempts to examine the status of education in Nigeria and thereby seeks solutions by exploring Nigeria's and global historical perspectives, current trends, and future directions regarding students and learning, teachers and teaching, the school curriculum, and administration of schools. It is expected that the comprehensive nature of the text will be beneficial to individuals in teacher preparation programs as well as those who plan to work with children in pre-kindergarten, nursery, through secondary settings. The chapter content of the book focuses on the variation of thought as to the principal objectives of educators to help students in Nigeria develop habits, skills, and ideas and help them to think. It adds to the importance of providing education to all, especially at the time when Nigeria is frankly making an effort to affirm democracy. For any nation to be truly democratic, it must maintain an educated electorate. Education prepares people to make informed decisions that affect the society. All children in Nigeria should therefore receive an education to prepare them to become effective members of the world society. This book seeks to

examine and reflect on education in Nigeria and globally are genuinely working in order to produce not only intelligent men and women who will be cultured and skilled but also the leaders who will adapt themselves to their environment adjust themselves to the outside world and give direction and purpose to their people for the building of a modern nation whose nationals must realize that they are destined to give leadership in many directions of human endeavour Dr Nnamdi Azikiwe FMR President of Nigeria speaking of progressive elements of Nigeria
