Aeronautics and Space Administration,1962 **Saving Lives with Force** Michael E. O'Hanlon,2010-12-01 Military analyst
Michael O Hanlon shows how outside forces could successfully intervene to stop an ongoing cycle of warfare in a country
whose government has collapsed or come under severe internal challenge Based largely on recent U S experiences in
Panama Somalia Bosnia and elsewhere as well as on U S military doctrine and information from the Pentagon s training and
simulation centers the book discusses the steps in an intervention and estimates likely casualties and costs O Hanlon shows
that modern Western militaries are capable of executing these types of operations with high proficiency While conditions are
unlikely to resemble those of Desert Storm which allowed the U S and allies to take full advantage of modern technology top
notch militaries have advantages in infantry combat situations night vision equipment attack and transport helicopters
counterartillery radars that would enable them to establish order and prevail in any firefights O Hanlon warns that
operations as casualty free as those in Haiti and to date in Bosnia would be unlikely Moreover the political framework that
outside powers would attempt to employ in establishing a new order would be critical if intervening forces are seen as taking
sides or occupying territory without legitimacy they could meet protracted guerrilla style resistance of the types witnessed in
Vietnam Afghanistan and Somalia Part of the Studies in Foreign Affairs series Scientific and Technical Aerospace Reports
