

Cultural Differences in the Better-Than-Average Effect  
for Easy and Difficult Skills

## BETTER-THAN-AVERAGE EFFECT ACROSS CULTURES

2

*Abstract*

Japanese and American college students rated themselves compared with their peers in terms of their ability to perform various skills. There were four easy skills for which people generally judge themselves to be better than their peers (the better-than-average effect) and four difficult skills for which people generally judge themselves to be worse than their peers (the worse-than-average effect). The American students showed a stronger better-than-average effect for easy skills—consistent with previous research—but they also showed a stronger worse-than-average effect for difficult skills. The latter result, in particular, seems inconsistent with the idea that Americans are more strongly motivated to be better than their peers. It is consistent, however, with an explanation based on cognitive egocentrism. Both the American and Japanese students thought more about their own abilities than about their peers' abilities, leading them to judge themselves as more extreme than their peers. But this tendency was stronger among the American students.

**Narrative as Writing and Literacy Pedagogy for Preservice Elementary Teachers** Nancy A. Wasser, 2021-08-16 I just cannot write or I am not a good writer are familiar complaints from students in academia Many of them claim they cannot express themselves clearly in written text and their lack of this skill impedes them in their academic career In this book Nancy A Wasser argues that teachers can help solve this when they start viewing writing not as secondary to reading but as the equally important side of the same coin Those who cannot read will not be able to write Wasser explains how teaching and regular practicing of writing skills from an early age onwards helps children grow into students who are self aware of their voices By employing narrative as a process of learning to write and a way to read teachers can teach children the art of writing while also making children more aware of their own constructions of narrative Combining the focus on individual and group expression in writing lessons students can trace and reflect on their own life transformations through their writing process Good writers are not born that way but made through effort and practice Changes in curriculum may not only lead to better expressed citizens but also to more balance between teacher and children voices
