Politics and the Class Divide David Croteau, 1995 People don't believe they have a say anymore so they've given up. That's the cynical conclusion of one worker in this study of the relationships between working people and the middle class left. This rare accessible book on class differences in American life examines the impact of class status on an individual's participation or non-participation in the political process. Focusing on the relative absence of white working class involvement in many contemporary U.S. liberal and left social movements, David Croteau goes straight to the source: members of the working class and activists in the environmental, peace, women's, and other social movements. Croteau rejects standard assumptions that apathy or simple conservatism explain working class nonparticipation. Instead, he highlights the role of class-based resources and explores how varying cultural tools developed in different classes are more or less helpful in navigating and influencing the existing political environment. Commonly, he finds the result is a middle class sense of power and entitlement and a working class sense of powerlessness and fatalism. Contemplating the future of social movements, he explores how lack of diversity hurts the effectiveness of what have become isolated middle class movements and proposes solutions that would increase the future political participation of working people in social movements. Author note: David Croteau, Assistant Professor of Sociology at Virginia Commonwealth University, is co-author of *By Invitation Only: How the Media Limits Political Debate*.
