

Roller Door Operator

IMPORTANT PLEASE READ THESE INSTRUCTIONS CAREFULLY PRIOR TO COMMENCING THE INSTALLATION OF THE OPERATOR UNIT

This Automatic Opener has been designed to provide years of trouble free use.

READ THESE IMPORTANT SAFETY RULES FIRST

Keep the garage door balanced. Sticking or binding doors must be repaired. Garage door, door springs, brackets and their hardware are under extreme tension and can cause serious personal injury. **Do not attempt adjustment.** Call for professional garage door service.

Do not wear rings, watches or loose clothing while installing or servicing a garage door operator.

Installation and wiring must be in compliance with your local building and electrical codes. Connect the power cord only to properly earthed mains.

The safety reverse system test is very important. Your garage door must reverse when obstructed on closing. Failure to properly adjust the operator may result in serious personal injury from a closing garage door. Repeat the test once a month and make any needed adjustments. (See Sensitivity adjustment).

This unit should not be installed in a damp or wet space.

Use the manual release Pull Rope to disengage the motor drive **ONLY** when the drive is switched OFF and, if possible, when the door is fully closed.

Do not use the force adjustments to compensate for a binding or sticking garage door. Excessive force will interfere with the proper operation of the Safety Reverse System or damage the garage door.

Disengage all existing garage door locks to avoid damage to garage door.

Install any additional Push Buttons in a location where the garage door is visible, but out of the reach of children. Do not allow children to operate push button (s) or remote control (s). Serious personal injury from a closing garage door may result from misuse of the operator.

CAUTION: Activate operator only when the door is in full view, free of obstructions and the operator is properly adjusted. No one should enter or leave the garage while the door is in motion. Do not allow children to play near the door.

Disconnect electric power to the garage door operator before making repairs or removing covers.

IMPORTANT: Fix the caution label supplied to the rear of the garage door as a reminder of safe operating procedures.

NOTE: When you disengage the unit, please move the door gently. Left hand and right hand switch must set before power up.

Cognitive Rehabilitation in Dementia Linda Clare,Robert T. Woods,2001 The relevance of cognitive rehabilitation for people with dementia is becoming increasingly accepted by researchers and practitioners in the field This special issue draws together examples of state of the art research and systematic review by experts in this exciting and growing area The contributors show how cognitive rehabilitation approaches can be applied in different ways to help optimise functioning and address specific difficulties across the full spectrum of severity While the main focus is on the more commonly diagnosed forms of dementia treatment possibilities for people with fronto temporal dementia are also explored Cognitive rehabilitation interventions need to be grounded in a clear assessment of the profile of strengths and limitations in cognitive functioning and to demonstrate where possible that treatment effects extend beyond improvement on target measures to have a meaningful impact on wellbeing and quality of life For this reason the special issue includes contributions that explore detailed aspects of cognitive functioning or describe new developments in evaluating quality of life in dementia Cognitive rehabilitation it is suggested should be viewed as one important component of a holistic approach to helping people

with dementia their families and those who care for them This special issue seeks both to provide information about what has already been achieved and to encourage and stimulate further progress
