From the Ground Up Patrick Daly, R Michael Feener, Anthony J S Reid, 2012 The tsunami that struck a dozen countries around the Indian Ocean on 26 December 2004 evoked international sympathy on a scale beyond any previous natural disaster The international relief effort broke all records both in scale and diversity with seven billion U S dollars donated from all over the world through public and private agencies for Sumatra alone Simply as a reconstruction effort therefore the disbursement of those funds and the rebuilding of housing infrastructure and economy posed major national and international challenges However this was not simply a reconstruction effort Aceh at that time was a war zone with Indonesia's military engaged in a major operation to crush a separatist rebellion that had been simmering since 1976 Even though the funds had been donated for tsunami relief any real reconstruction of Aceh had to consider the impact of the conflict on the well being of the population as well as governance and administrative capacities This volume serves the purpose not only of discussing some of the lessons of the Aceh reconstruction and peace processes but also of maintaining critical links between Aceh and the international community after the initial tranches of aid expire

Thomas Kuhn Juan V. Mayoral, 2025-09-22 This new biography of Thomas S Kuhn pays attention to the continuous development of his ideas Mayoral provides a comprehensive overview of Kuhn's life and work The book explores how Kuhn's theory develops from its beginnings at Harvard University in the early 1950s through the early 1990s at the MIT and also describes Kuhn's parallel lifetime Between those decades 1950s and 1990s Kuhn went through different academic institutions obtained a high status as a public intellectual and shifted from the history of science to the philosophy of science and back as his main research target All of this left a trace in his philosophical view of science enriching and changing it since his early training as a theoretical physicist In this book Kuhn is considered as an intellectual in evolution and his contributions are assessed against the backdrop of the different contexts that he traversed Therefore there shall not be a static figure of this intellectual as there shall not be a static figure of the surrounding intellectual contexts either At the same time however this book is planned so that each chapter provides the reader with a picture of a significant period in Kuhn's development and the main ideas that can be observed in it The book is useful for

upper undergraduates in philosophy especially in philosophy of science in general history and history of science in the social sciences and other fields of humanities and for scientifically trained individuals interested in this author Kuhn scholars shall find this book useful for their studies on Kuhn insofar as new unpublished documents are employed new facts about Kuhn's life are provided and a full interpretation of Kuhn's evolving system of philosophy of science is built and discussed

Nash, 2022-01-27 British Islam and English Law presents a novel argument about the nature and place of groups in society The encounter with Islam has led English law to tread a line between two theoretical models liberal individualism and multiculturalism competing for dominance over the law of organised religion This philosophical rivalry has generated a set of seemingly intractable conflicts between individual and community religion and state nation and culture This book resurrects the long buried theory of classical pluralism to address and resolve these tensions Applying this to five understudied institutions that give structure and form to British Islam banks charities schools elections clans it outlines and justifies the reforms that would optimise the relationship between law and religion Unflinching and unorthodox this book places law and theory in context employs innovative methods such as nudge theory and applied history and provides detailed answers to hard questions about British Islam *New Literacies and Teacher Learning* Michele Knobel, Judy Kalman, 2016-03-30 New Literacies and Teacher Learning examines the complexities of teacher professional development today in relation to new literacies and digital technologies set within the wider context of strong demands for teachers to be innovative and to improve students learning outcomes Contributors hail from Argentina Australia Canada Finland Mexico Norway and the U S and work in a broad range of situations grade levels activities scales and even national contexts Projects include early year education through to adult literacy education and university contexts describing a range of approaches to taking up new literacies and digital technologies within diverse learning practices While the authors present detailed descriptions of using various digital resources like movie editing software wikis video conferencing Twitter and YouTube they all agree that digital stuff while important is not the central concern Instead what they foreground in their discussions are theory informed pedagogical orientations collaborative learning theories the complexities of teachers workplaces and young people's interests Thus a key premise in this collection is that teaching and learning are about deep engagement representing meanings in a range of ways These include acknowledging relationships and knowledge thinking critically about events phenomena and processes and participating in valued social and cultural activities The book shows how this kind of learning doesn't simply occur in a one off session but takes time commitment and multiple opportunities to interact with others to explore play make

The Transformation of the World of War and Peace Support Operations Kobi

Michael, David Kellen, Eyal Ben-Ari, 2009-03-20 With the end of the Cold War the euphoria of the Gulf War of the 1990s and the avowal of a New World Order peace operations were declared as the recipe for a better world through international intervention in conflict arenas However the debacles and failures in Cambodia Somalia or the Balkans led to disillusionment and a sense of strategic helplessness among leaders experts and scholars in the industrial democracies While these arguments have been the focus of intense criticism and discussion they nevertheless underscore the fact that since the end of the Cold War the armed forces of the industrial democracies have undergone very significant transformations This is the first work linking the changes in armed forces to Peace Support Operations PSOs those operations with major state building components that demand broad and coherent cooperation between military forces and civilian entities The Transformation of the World of War and Peace Support Operations is timely as the recent debates over PSOs continue to take center stage This work embodies a new set of ideas and concepts that aid in grasping and interpreting the transformations taking place in the world of war and in PSOs It seeks to understand how social economic political and organizational transformations around the globe are related to the complex links between armed forces and PSOs Additionally this work addresses issues that continue to define the character and makeup of modern warfare and the missions of PSOs for coming decades
