

Why Orkut failed

Security Issues

- Security feature was not strong enough. Couldn't control in terms of privacy.
- Lot of spammers destroyed the whole experience.
- Lot of fake profiles and communities were developed.
- Orkut couldn't address the issues of 'report abuse' of a large pool of users.

User Interface

- Features such as like, share and tag were missing from what.
- Redirected to a different screen while posting a comment.
- Features of news cutting and video chat were not developed.
- Sharing was not introduced in the same platform.

No Broadcasting to Networks

- No means to share all the pictures or posts to friends via broadcasting.
- Need to visit the profiles of every friend to know what's happening.
- No trendy tags could be introduced. No videos or photos could be made viral.

No Community Support

- One would run out of things to do on orkut. People had to search for content.
- No feature of news feed.
- Facebook on the other hand tells a lot about your activities to your friends and thus gives them something to comment upon.

Limited Email Support

- Redesigned user interface was not at all appealing.
- Took more time to load the page.
- Took more storage space in the system of the users.

No Business Levels

- Orkut didn't allow advertising on its website.
- It didn't allow brands to feature their product. Their availability was limited.
- It didn't allow business page creation, which could have attracted the customers.

No Updates

- Writing on 'wall' or 'scripping' was no longer source of engagement for the users.
- No option was provided to 'follow' the posts of a person.
- No further version was released into the market after the beta version.

Trindade, 2024-09-24 The adverse societal impacts of social media platforms comprise a subject of global concern given that this digital technology has become a breeding ground for the manifestation of varied forms of online harassment and abuse Yet most studies exploring this phenomenon have done so predominantly in Anglophone social contexts notably the US and the UK Thus the present work examines hate speech and abusive behaviour adopting an innovative cross cultural perspective To this end the book analyses a sample of 108 scholarly papers originally published in three non hegemonic languages Italian Portuguese and Spanish and encompassing 11 countries Argentina Brazil Colombia Costa Rica Ecuador El Salvador Italy Mexico Peru Portugal and Spain In this context the development of this study highlights the relevance of considering cultural historical and linguistic factors when analysing hate speech and abusive behaviour on social media By confronting and evaluating findings from different countries and languages the study sheds light on how cultural norms and language use shape the manifestation and impact of online harassment and abuse Besides the study also reveals that social media plays the pivotal dual role of catalyst and vehicle for disseminating hate and abuse As such they can bring a series of adverse societal impacts upon individuals vulnerable social groups society and democracy Ultimately social media platforms allow offenders the capability to unleash and disseminate aggressive and discriminatory ideologies attracting numerous like minded people to subvert and disregard any social convention constraints and norms of conviviality Consequently one of social media s most significant negative impacts is the undermining of social cohesion Therefore the present book is of interest to students established scholars and researchers in various disciplines including sociology criminology media and communication studies and digital humanities Moreover it is recommended reading for policymakers leaders of non governmental organisations educators journalists and anyone interested in learning more about social media s impacts on people s lives **Internet Co-Regulation** Christopher T. Marsden, 2011-08-18 Chris Marsden argues that co regulation is the defining feature of the Internet in Europe Co regulation offers the state a route back into questions of legitimacy governance and human rights thereby opening up more interesting conversations than a static no regulation versus state regulation binary choice The basis for the argument is empirical investigation based on a multi year European Commission funded study and is further reinforced by the direction of travel in European and English law and policy including the Digital Economy Act 2010 He places Internet regulation within the regulatory mainstream as an advanced technocratic form of self and co regulation which requires governance reform to address a growing constitutional legitimacy gap The literature review case studies and analysis shed a welcome light on policymaking at the centre of Internet regulation in Brussels London and Washington revealing the extent to which states firms and increasingly citizens are developing a new type of regulatory bargain **Country Reports on Human Rights Practices** , 2007 **Online Child Sexual Abuse** Elena Martellozzo, 2013-06-17 Online Child Sexual Abuse Grooming
