instruction The first chapter describes the tasks and evaluation criteria used in the study and highlights results of the study including the following 1 although many students appeared to know the basic elements of analytic writing such writing was difficult for students in all grades 2 while most students could express their points of view in persuasive writing many had difficulty providing evidence for those viewpoints 3 students had less difficulty with tasks requiring short responses based on personal experience 4 students found it moderately difficult to write well developed stories 5 home environment is related to writing achievement 6 students who indicated writing three or more reports and essays during a 6 week period had higher achievement levels than students who reported not writing during that time period 7 students positive attitudes toward writing deteriorate steadily across the grades 8 students reported that their teachers are more likely to mark mistakes than to show an interest in what they write or to make suggestions for the next paper and 9 content area writing increases between grades four and eight and decreases again in senior high school The next four chapters provide specific achievement data by grade level for informative persuasive and imaginative writing and for writing performance among various demographic subgroups The remaining three chapters focus on students responses to questions concerning writing and writing instruction specifically their values and attitudes toward writing how they manage the writing process and what they write and the help they receive HTH **Best Practices in Writing Instruction** Steve Graham, Charles A.

teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook *Beyond Monet The Artful Science of Instructional Intelligence* However through their journeys of becoming teacher learner researchers many discovered numerous creative variations of Bennett s work as it was implemented in their classrooms While there are many professional books that provide ideas on collaborative learning and creative teaching approaches there is very little published research on the efficacy of these concepts in the K 12 classroom These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students learning Thus this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century

Writing Through the Tween Years Bruce Morgan, Deb Odom, 2005 It s not easy being a tween A lot of us are either in a tunnel or a bridge A lot of us don t know who we are Instead of following Barney s advice we end up doing what popstars do Kelley age 10 No longer little children but not yet teenagers tweens are beginning to see themselves as autonomous while still struggling to understand where they fit in It can also be an awkward time for teachers who cherish the hilarious and poignant personalities of tween writers but feel pressured by a new emphasis on testing in the intermediate grades Many teachers have virtually abandoned writers workshops in favor of formula writing and prompts even though these workshops may be essential for understanding the emerging competencies and personalities of eight to twelve year olds Bruce Morgan and Deb Odom teach together at a school where formula writing and test preparation led to stagnant writing scores student boredom and teacher discouragement They worked with their colleagues in grades 3 6 to make some dramatic changes in their collective writing instruction These changes included a return to their roots as writing workshop teachers but with new twists The teaching staff drew up new common standards for writing assessment and achievement The revised writing programs also involved integrating insights from reading strategy instruction with a renewed emphasis on the basics of writers workshop student choice teacher modeling revision and using quality children s literature as mentor text *Writing Through the Tween Years* documents how teachers can get back to the joys of teaching writing in a literature rich thoughtful environment There may be no better way to understand and reach tween writers
