Webb,2024-08-20 South Africa's higher education sector is rooted in the country's divided past. A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities. But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges. Nelson Mandela University is one of the public universities that emerged from the restructuring process. The university is in an ongoing state of evolution of becoming. It developed out of the amalgamation of the University of Port Elizabeth, Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005. In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located. The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake. Endeavouring to be something greater and different from the norm imbues its strategy, public statements and practices. The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar. A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution. While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else. In *Achieving Nelson Mandela University* the university attempts to give an account of itself. The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go.

**Political Science in South Africa** Peter Vale, Pieter Fourie, 2016-01-13 In 2013 and in 2014 respectively the South African Association of Political Studies (SAAPS) and Politikon the South African Journal of Political Studies celebrate their 40th anniversary. Also in April 2014 South Africa celebrates twenty years since the advent of the post Apartheid democracy and the birth of the rainbow nation. This book provides a timely account of the birth and evolution of South African politics over the past four decades but also of the study of Political Science and International Relations in this country. Fourteen political scientists contribute chapters to this volume situating the study of politics within its global context and recounting the development of politics as a field of study at South African universities. The fourteen contributions evaluate the state of the discipline's and suggest conclusions that are surprising and in many instances unsettling not only with regards to what and how politics is taught but also how its study has variously gained and lost pertinence for South Africans' understanding of their own polity as well as its place in the world. The implications are uncomfortable and pose interesting challenges for South African scholarship, pedagogy and national self reflection. This book was published as a special issue of Politikon.

**The History of Geophysics in Southern Africa** Johan H de Beer, 2016-01-25 Geophysics is a comparatively young

science which only evolved as a distinct discipline during the 19th century. However its phenomena like earthquakes tsunamis volcanic eruptions and lightning had been objects of fear curiosity and speculation since ancient times. In this book Johan de Beer and his research team reveal that geophysical activity in South Africa can be traced back to as early as 1488. This is a truly astonishing revelation which deserves to be firmly entrenched as part of the country's proud history. The book also discusses the history and formation of South African geophysical institutions that made a huge and seldom acknowledged contribution to the technological development of southern Africa.

The role secondary cities play in the global space economy and national urban hierarchies is increasingly receiving attention from scholars and international agencies most notably the Cities Alliance. *Secondary Cities and Development* considers the role of secondary cities through the lens of South Africa a middle income country with characteristics of both the developed and developing worlds. This book brings together a broad overview of international literature on secondary cities in South Africa and mirrors them against global experience. Chapters emphasize the importance of secondary cities as regional services areas their potential roles in rural development the vulnerabilities to which they are prone and their significant potential. By means of review six South African case studies and an assessment of contemporary policy approaches towards these cities this unique volume provides insight into a spectrum of globally significant challenges. **Reflections of South African University Leaders: 1981 to 2014** Council on Higher Education, 2016-03-17. Much has been written about the ever growing demands on university leadership worldwide in the face of increasingly complex changes and challenges from within the academy and beyond. However as we are reminded by Johan Muller in the Introduction to this book there are particular features of time and place that also throw up unique problems. It is precisely time and place that make this set of reflections by university leaders quite remarkable and distinguishes it from the many biographies to be found in the literature on higher education leadership. In the main this collection spans two decades the 1990s and 2000s of unprecedented levels of change in South African higher education. Leaders in universities as well as those responsible for higher education policy in the government and associated statutory bodies had no neat script to work off nor manuals or prescripts of good leadership or practice.

Instead there was palpable excitement about collectively imagining and nurturing a new post apartheid higher education system which would contribute to the social and economic development needs of the country the deepening of democracy and which would also be globally relevant Most reflections touch on the coalface of leadership which is the face to face interactional dimension dealing with staff with students with council chairs What comes through clearly is the importance of what are sometimes called people skills In these accounts this is not simply presented as a human relations aptitude for a number of reasons first of which is the special nature of universities and their occupants More than one points out the special challenge of managing the talented people that are academics and their inbuilt distaste for bureaucracy their reluctance to be managed or told what to do The message here is consistently one of needing to be completely open with academics the importance of maintaining the distinction between collegial and executive management avoiding managerialism and the critical importance of winning and holding their trust The inspiration for this collection arose in late 2013 in the Council on Higher Education s CHE Monitoring and Evaluation Directorate the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector They noted that conditions besetting universities had grown increasingly complex both globally but more especially locally and the question arose how had this altered the challenges to university leadership over the period between the new political dispensation and the second decade of the new millennium More particularly how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges How did they see the main changes that needed dealing with What challenges did these changes pose and how were they successfully overcome What did they think looking back were the main constituents of successful leadership and management What wisdom could be distilled for posterity The Directorate decided to invite a range of vice chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication

**Emancipatory Imaginations** Dina Zoe Belluigi, André Keet, 2025-02-28 The study of higher education presupposes the goodness of the university and the academy and the scholars who study them Yet the social justice intent of both have long been questioned and may be emptied out This book explores generative developments of other ways to study more critically and productively the university across disciplines While framed affirmatively this endeavour is a space of refusal Refusal of the status quo of the taken for granted and of hegemonic powers and violences that continue within and outside higher education institutions Part I explores possible emancipatory frames to in form transformative change and its enquiry Its four chapters deliberate how Critical University Studies may be advanced in relation to its own histories of intellectual emergence decolonial theory Abolitionist Studies sustainable development and the African university Part II asks questions about the conditions of possibility for advancing Critical University Studies Particular disciplines fields of study cases contexts and methods of analysis are discussed within the contexts of Canada Germany India South Africa and the United Kingdom Exploring the effects on different academic citizens and figures the six chapters in this section combine to assert the pervasiveness of the problematics of the politics of participation for marginalised and minoritised academic citizens agency and authority and to uphold the value of resistance in the formation and authorisation of persons and knowledges Part III re turns to the necessity for reflexivity The two chapters engage with its importance for scholarship and praxes for critical work to be disruptive Recognising the potential of critique to re produce harmful patterns requires such logics and desires be identified and interrupted Emancipatory Imaginations Advancing Critical University Studies mobilises engagement with the question of how the critical study of the university is to be advanced in scholarship framing practice and praxes within beyond and against traditions of the past and present It is thus of interest to academics students and intellectuals who are concerned with transformative change within universities
