No Child Left Behind Report 2007:

Reauthorizing No Child Left Behind Brian M. Stecher, Georges Vernez, 2010-04-08 Studies suggest that the No Child Left Behind Act of 2001's goal of 100 percent of U.S. students proficient in reading and mathematics by 2014 will not be met. The authors recommend more uniform state academic standards and teacher requirements and broader measures of student learning including more subjects and tests of higher thinking and problem solving skills.

No Child Left Behind William Hayes, 2008-08-14 While few would quarrel with the goal of the No Child Left Behind legislation, the nation is badly divided over whether the law is having a positive effect on our schools. At the same time, it is also true that most Americans, including many professional educators, have only a limited understanding of the content and scope of the legislation. As we are currently engaged in a national debate about the future role of the federal government in the field of education, it is essential that people become better informed about the history, content, and results of No Child Left Behind. This book is a valuable tool informing the current discussion on the reauthorization of the law. As a result, the reader will be better able to make up his own mind as to the direction we should take as a nation in pursuing the noble objective of ensuring that no child is left behind.

No Child Left Behind Paul H. Berkhart, 2008 This book presents the latest developments related to the No Child Left Behind Act of 2001 legislation to extend and revise the Elementary and Secondary Education Act (ESEA) which was signed into law as P.L. 107-110, H.R. 1. This legislation extensively amends and reauthorizes many of the programs of federal aid to elementary and secondary education. Major features of the No Child Left Behind Act of 2001 include the following:

- a states will be required to implement standards-based assessments in reading and mathematics for pupils in each of grades 3-8 by the 2005-2006 school year and at three grade levels in science by the 2007-2008 school year;
- b grants to states for assessment development are authorized;
- c all states will be required to participate in National Assessment of Educational Progress tests in 4th and 8th grade reading and mathematics every second year;
- d states must develop adequate yearly progress (AYP) standards incorporating a goal of all pupils reaching a proficient or advanced level of achievement within 12 years and apply them to each public school, local education agency (LEA), and the state overall;
- e a sequence of consequences including public school choice and supplemental services options would apply to schools and LEAs that fail to meet AYP standards for 2 or more consecutive years;
- f ESEA Title I allocation formulas are modified to increase targeting on high-poverty states and LEAs and to move Puerto Rico gradually toward parity with the states;
- g within 3 years, all paraprofessionals paid with Title I funds must have completed at least 2 years of higher education or met a rigorous standard of quality;
- h several new programs aimed at improving reading instruction are authorized;
- i teacher programs are consolidated into a state grant authorizing a wide range of activities such as teacher recruitment, professional development, and hiring;
- j states and LEAs participating in Title I have various requirements to ensure that teachers meet the bill's definition of highly qualified by the end of the 2005-2006 school year;
- k almost all states and LEAs are authorized to transfer a portion of the

funds they receive under several programs and selected states and LEAs may consolidate funds under certain programs through performance agreements l federal support of public school choice is expanded m several previous programs are consolidated into a state grant supporting integration of technology into K 12 education n the Bilingual and Emergency Immigrant Education Acts are consolidated into a single formula grant with existing limits on the share of grants for specific instructional approaches eliminated and o the 21st Century Community Learning Center program is converted into a formula grant with increased focus on after school activities

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Failure Vicki E. Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book Failure The Federal Miseducation of America s Children As its title indicates Failure makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether

related to testing funding or academic curricula has failed to abide by the Constitution's implication that education must remain the domain only of state and local governments and private institutions. Most of all, the central government's pervasive meddling in education has failed America's school children and their parents. Education policy has long been mired in controversies, often with opposing sides missing the mark. *Failure* helps us step back from the skirmish du jour and redirects our focus to the big picture, showing us what's gone wrong over the decades and the institutional causes of these failures. It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats. Concerned citizens of every stripe will benefit from *Failure's* history of federal education policy, its brutally honest report card for the Department of Education, its look at education systems across the globe, and its ambitious policy recommendations. *Failure* might even succeed in reframing the way the federal education establishment thinks about education policy.
