Anti-Gravitational Force and the Hierarchically Stratified Space-Time Geometry in 12 Dimensions Christina Anne
 Knight, 2010-08-09 The field of cosmology may be on the verge of a significant paradigm shift as there is an increasing
 awareness that scientists have missed something fundamental as they carry on in their quest for a theory of everything and a
 theory that unites general relativity with quantum mechanics Knight proposes a new theory suggesting that the space time
 geometry possesses a complex hierarchical structure that comprises twelve dimensions nine space dimensions and three time
 Furthermore this structure is divided into three strata each of which has its own four dimensional structure and stratum
 specific fundamental forces and parameters with variations in the gravitational constant G the speed of light c and the Planck
 constant Through the pages of this work this theory is further explained **Conceptual Physics** Paul G. Hewitt, 2011-09
