Race in Education Gerhard Mar,,2019-05-28 There is global evidence that ghosts of notions of essentialist differences between human groups continue to haunt in various forms People draw upon ideas of religion race ethnicity gender and sexuality and nation to draw distinctions Racism xenophobia sexism and right wing populism are ongoing and increasing phenomena In addition genetic science has introduced new forms of proof which lends itself to misuse to confirm common sense perceptions The valuable contributions of the authors in this publication not only warn against such notions but offer ways of exploring exposing and challenging the ghosts and the fears engendered through their contemporary forms The Unresolved National Question in South Africa Edward Webster,Karin Pampallis,John Mawbey,Jeremy Cronin,2017-03-01 This volume examines the way in which various strands of left thought have addressed the National Question The re emergence of debates on the decolonisation of knowledge has revived interest in the National Question which began over a century ago and remains unresolved Tensions that were suppressed and hidden in the past are now being openly debated Despite this the goal of one united nation living prosperously under a constitutional democracy remains elusive This edited volume examines the way in which various strands of left thought have addressed the National Question especially during the apartheid years and goes on to discuss its relevance for South Africa today and in the future Instead of imposing a particular understanding of the National Question the editors identified a number of political traditions and allowed contributors the freedom to define the question as they believed appropriate in other words to explain what they thought was the Unresolved National Question This has resulted in a rich tapestry of interweaving perceptions The volume is structured in two parts The first examines four foundational traditions Marxism Leninism the Colonialism of a Special Type thesis the Congress tradition the Trotskyist tradition and Africanism The second part explores the various shifts in the debate from the 1960s onwards and includes chapters on Afrikaner nationalism ethnic issues black consciousness feminism workerism and constitutionalism The editors hope that by revisiting the debates not popularly known among the scholarly mainstream this volume will become a catalyst for an enriched debate on our identity and our future **The Statesman's Yearbook 2017** Palgrave Macmillan,2017-02-28 Now in its 153rd edition The Statesman s Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world Covering political economic social and cultural aspects the Yearbook is also available online for subscribing institutions www.statesmansyearbook.com **Global Perspectives and Key Debates in Sex and Relationships Education** V. Birth controlled Amrita Pande, 2022-06-14 Birth controlled analyses the world of selective reproduction the politics of who gets to legitimately reproduce the future through a cross cultural analysis of three modes of controlling birth contraception reproductive violence and repro genetic technologies It argues that as fertility rates decline worldwide the fervour to control fertility and fertile bodies does not dissipate what evolves is the preferred mode of control Although new technologies like those that assist conception or allow genetic selection may appear to be an antithesis of other violent versions of population control this book demonstrates that both are part of the same continuum All population control policies target and vilify women Black women in particular and coerce them into subjecting their bodies to state and medical surveillance Birth controlled argues that assisted reproductive technologies and repro genetic technologies employ a similar and stratified burden of blame and responsibility based on gender race class and caste To empirically and historically ground the analysis the book includes contributions from two postcolonial nations South Africa and India examining interactions between the history of colonialism and the economics of neoliberal markets and their influence on the technologies and politics of selective reproduction The book provides a critical interdisciplinary and cutting edge dialogue around the interconnected issues that shape reproductive politics in an ostensibly post population control era The contributions draw on a breadth of disciplines ranging from gender studies sociology medical anthropology politics and science and technology studies to theology public health and epidemiology facilitating an interdisciplinary dialogue around the interconnected modes of controlling birth and practices of neo eugenics
