Tourism and Citizenship Raoul Bianchi, Marcus Stephenson, 2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate However despite the fact that cross border travel implies certain citizenship rights as well as the material capacity to travel the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel The text weaves its analysis of citizenship and travel in the context of addressing large scale societal transformations engendered by globalization neoliberalism and the geopolitical realignments between states as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves By doing so it focuses on key themes including tourism and social citizenship rights race culture and minority rights states markets and the freedom of movement tourism peace and geo politics consumerism and class and ethical tourism global citizenship and cosmopolitanism The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science The royalties received from this book will be donated to the International Porter Protection Group

Why is there so little industry in Africa Over the past forty years industry has moved from the developed to the developing world yet Africa s share of global manufacturing has fallen from about 3 percent in 1970 to less than 2 percent in 2014 Industry is important to low income countries It is good for economic growth job creation and poverty reduction Made in Africa Learning to Compete in Industry outlines a new strategy to help African industry compete in global markets This book draws on case studies and econometric and qualitative research from Africa and emerging Asia to understand what drives firm level competitiveness in low income countries The results show that while traditional concerns such as infrastructure skills and the regulatory environment are important they alone will not be sufficient for Africa to industrialize The book also addresses how industrialization strategies will need to adapt to the region s growing resource abundance If All the World Were Paper

Tyler W. Williams,2024-10-01 How do writing and literacy reshape the ways a language and its literature are imagined If All the World Were Paper explores this question in the context of Hindi the most widely spoken language in Southern Asia and the fourth most widely spoken language in the world today Emerging onto the literary scene of India in the mid fourteenth century the vernacular of Hindi quickly acquired a place alongside classical languages like Sanskrit and Persian as a medium of literature and scholarship The material and social processes through which it came to be written down and the particular form that it took as illustrated storybooks loose leaf textbooks personal notebooks and holy scriptures played a critical role in establishing Hindi as a language capable of transmitting poetry erudition and even revelation If All the World Were Paper combines close readings of literary and scholastic works with an examination of hundreds of handwritten books from

precolonial India to tell the story of Hindi literature's development and reveal the relationships among ideologies of writing material practices and literary genres Tyler W Williams forcefully argues for a new approach to the literary archive demonstrating how the ways books were inscribed organized and used can tell us as much about their meaning and significance as the texts within them This book sets out a novel program for engaging with the archive of Hindi and of South Asian languages more broadly at a moment when much of that archive faces existential threats **First Expressions** Steve Taylor, 2019-12-30 Seeking insight from the real life development of the earliest expressions of emerging church from their birth through times of adolescent angst and into the reality of adulthood this book offers a unique insight into the long term sustainability of fresh expressions *EU Constitutional Law* Allan Rosas, Lorna Armati, 2012-08-03 The second revised edition of this acclaimed book brings the story of the EU's constitutional journey up to date The EU's constitution composed of a myriad of legal texts case law and practice is a moving target subject to continuous change and the past two years have seen no slacking in the pace of that change With a wider geographical ambit than ever the EU faces unprecedented political economic and cultural challenges all of which impact upon the evolution of its constitution Moreover the crisis in the Eurozone has given rise to the need for a whole new chapter focussing on the institutional reforms embarked upon in the quest to restore financial order The book succeeds where others have struggled in making sense of the EU's complex constitutional order focussing on its essential features but taking into account the profound changes that have taken place over the past 20 years The EU has become much more than an internal economic market and has recently become active in areas such as immigration and third country nationals security and defence policy and penal law and procedure while the crisis in the Eurozone has triggered an increasing focus on economic and fiscal policy Eschewing too much detail the authors underline the essential values principles and objectives of the integration regime as well as its basic normative structure and hierarchy In this context the decentralised nature of the EU is highlighted as an integral part of its constitutional make up Recurring themes include European citizenship fundamental rights and the rule of law The book also confronts head on the problems and challenges facing the Union and the gap which is often perceived between lofty ideals and harsh realities The book will be useful to students of EU law and European integration but will also appeal to a broader audience of researchers and practitioners including political scientists **Political Economy of Financialization in the United States** Kurt Mettenheim, 2021-09-22 Combining balance sheet analysis with historical institutional analysis this book traces the evolution of social sector financial balance sheets in the US from 1960 to 2018 This innovative historical institutional approach ranging from the micro level of households to the macro level of the federal government reveals that the displacement of households by banks has been a long term process This gradual compounding of financialization is at odds with widely accepted views about financialization contemporary banking theory financial intermediation theory and post Keynesian and endogenous money approaches The book returns to time tested traditional principles of banking and taps unexpected affinities about

market failures in transaction cost economics financial intermediation theory and core ideas in classic modern political and social economy about economic moralities and social reactions of self defense against unfettered markets This book provides an alternative explanation for the rise of finance and new ways to think about averting financialization and its devastating consequences This book marks a significant contribution to the literature on financialization social economics banking and the American political economy *Sign Language Ideologies in Practice* Annelies Kusters,Mara Green,Erin Moriarty,Kristin Snoddon,2020-08-10 This book focuses on how sign language ideologies influence manifest in and are challenged by communicative practices Sign languages are minority languages using the visual gestural and tactile modalities whose affordances are very different from those of spoken languages using the auditory oral modality **Accountability for Mass Starvation** Bridget Conley,Alex de Waal,Catriona Murdoch,Wayne Jordash QC,2022-09-01 Famine is an age old scourge that almost disappeared in our lifetime Between 2000 and 2011 there were no famines and deaths in humanitarian emergencies were much reduced The humanitarian agenda was ascendant Then in 2017 the United Nations identified four situations that threatened famine or breached that threshold in north eastern Nigeria Somalia South Sudan and Yemen Today this list is longer Each of these famines is the result of military actions and exclusionary authoritarian politics conducted without regard to the wellbeing or even the survival of people Violations of international law including blockading ports attacks on health facilities violence against humanitarian workers and obstruction of relief aid are carried out with renewed impunity Yet there is an array of legal offenses ranging from war crimes and crimes against humanity to genocide available to a prosecutor to hold individuals to account for the deliberate starvation of civilians However there has been a dearth of investigations and accountability for those violating international law The reasons for this neglect and the gaps between the black letter law and practice are explored in this timely volume It provides a comprehensive overview of the key themes and cases required to catalyze a new approach to understanding the law as it relates to starvation It also illustrates the complications of historical and ongoing situations where starvation is used as a weapon of war and provides expert analysis on defining starvation early warning systems gender and mass starvation the use of sanctions journalistic reporting and memorialization of famine

Valentina Tesio, Katharina S. Goerlich, Masako Hosoi, Lorys Castelli, 2019-10-16 The Performance of Nations Jacek Kugler, Ronald L. Tammen, 2012-09-16 Why do some nations fail while others succeed How can we compare the political capacity of a totalitarian regime to a democracy Are democracies always more efficient The Performance of Nations answers these key questions by providing a powerful new tool for measuring governments strengths and weaknesses Allowing researchers to look inside countries down to the local level as well as to compare across societies and over time the book demonstrates convincingly that political performance is the missing link in measuring power and military capability For the theorist political performance data helps to fill in the gaps when GDP alone does not explain the outcome of wars For the practical policy specialist political performance sheds a bright light on why some governments succeed and some fail why investments disappear in one province but multiply in another and why it is easier to promote health programs in one region but not in its neighbor This groundbreaking book will be an essential resource for scholars policymakers and institutions interested in measuring the political capacities of nations and in knowing where foreign aid and investment will be most effective Contributions by Mark Abdollahian Marina Arbetman Rabinowitz Constantine Boussalis Travis G Coan Yi Feng Gaspare M Genna Kristin Johnson Mathew Jones Kyungkook Kang Mariah Kraner Jacek Kugler Tadeusz Kugler Hal T Nelson Masami Nishishiba Peter Noordijk Saumik Paul Siddharth Swaminathan Ronald L Tammen John Thomas Ayesha Umar Wahedi and Birol Yesilada
