1. Description

The electrical management system Elektroblock EBL 109-5 E is intended for the use in caravans. It consists of a charging module, a booster unit to raise the charging voltage, the complete fuse-protected 12V distribution, a plug connection for a solar regulator and additional control and monitoring devices.

The charging unit is designed as a primary controlled switch-mode power supply. This modern design ensures high power output with compact dimensions and light weight.

To operate the energy system and to control the living-area functions including accessories, a control panel is compulsory.

To make use of all functions the trailer connector has to be connected according to EN 1648-1. Refer to the attached schematic diagram and to the instruction manual of the caravan.
