Sue**

Arrowsmith, Luke RA Butler, Annamaria La Chimia, Christopher Yukins, 2021-11-04 This timely book provides the first systematic analysis of global public procurement regulation and policy during and beyond the COVID 19 pandemic Through both thematic chapters and national case studies this book explores the adequacy of traditional legal frameworks for emergency procurement examines how governments and international organisations have responded specifically to the pandemic and considers how the experience of the pandemic and the political impetus for reform might be leveraged to improve public procurement more broadly Public procurement has been critical in delivering vital frontline public services both in the health sector and elsewhere with procurement of ventilators protective equipment and new hospitals all hitting the headlines At the same time procurers have faced the challenge of adjusting existing contracts to a new reality where for example some contracted services can no longer operate Further efficient and effective procurement will be an essential and not a luxury in the economic recovery With case studies on Italy the UK the USA India Singapore Africa Latin America and China the book brings together the world's leading academics and practitioners from across Europe the Americas Asia and Africa to examine these issues providing an essential resource for policy makers legislators international organisations and academics This title is included in Bloomsbury Professional's Local Government Law online service *Study Material (UPPSC/UPNHM-CHO/AIIMS/BHU/DSSSB) YCT Expert Team , UPPSC UPNHM CHO AIIMS BHU DSSSB Study Material Solved Papers The Diversity Bargain* Natasha Warikoo, 2019-02-22 We've heard plenty from politicians and experts on affirmative action and higher education about how universities should intervene if at all to ensure a diverse but deserving student population But what about those for whom these issues matter the most In this book Natasha K Warikoo deeply explores how students themselves think about merit and race at a uniquely pivotal moment after they have just won the most competitive game of their lives and gained admittance to one of the world's top universities What Warikoo uncovers talking with both white students and students of color at Harvard Brown and Oxford is absolutely illuminating and some of it is positively shocking As she shows many elite white students understand the value of diversity abstractly but they ignore the real problems that racial inequality causes and that diversity programs are meant to solve They stand in fear of being labeled a racist but they are quick to call foul should a diversity program appear at all to hamper their own chances for advancement The most troubling result of this ambivalence is what she calls the diversity bargain in which white students reluctantly agree with affirmative action as long as it benefits them by providing a diverse learning environment racial diversity in this way is a commodity a selling point on a brochure And as Warikoo shows universities play a big part in creating these

situations The way they talk about race on campus and the kinds of diversity programs they offer have a huge impact on student attitudes shaping them either toward ambivalence or in better cases toward more productive and considerate understandings of racial difference Ultimately this book demonstrates just how slippery the notions of race merit and privilege can be In doing so it asks important questions not just about college admissions but what the elite students who have succeeded at it who will be the world's future leaders will do with the social inequalities of the wider world

Shattered Minds Robert H. Bauman,Dina Rasor,2019-03-01 Shattered Minds is the first book to investigate how American military bureaucracies have let our troops down by failing to upgrade one of the most important pieces of personal safety equipment the combat helmet Two longtime employees of North Dakota defense contractor Sioux Manufacturing discovered that the required density of the Kevlar material woven into the netting of combat helmets was being shorted After bringing their discovery to the attention of management their boss rather than cleaning up the illegal practice accused them of having an adulterous affair Both employees were fired leading to a lawsuit and a court judgment in their favor that eventually brought the company's bad faith practices to light Around the same time a separate whistleblower a retired Navy doctor was pulled into a bizarre struggle with Army and Marine bureaucracies when he discovered from his Marine grandson that the protective webbing inside the military helmets was inadequate Why was the military so resistant to upgrading the most essential piece of gear to protect soldiers from traumatic brain injury Interweaving these two whistleblower stories Robert H Bauman and Dina Rasor explain why the military despite news coverage and congressional hearings on the faulty helmet continued to do the indefensible They also suggest how the public the press and military institutions can remedy the problem to give U S troops effective helmets when serving to protect their country

Economy Mu. Naushad, Shamsul Rahman Mohamed Kutty, Sohrab Hossain, Abdullahi Haruna Birniwa, Ahmad Hussaini Jagaba, 2024-11-28 Bio Refinery of Industrial Effluents for a Sustainable Circular Economy provides a combined approach between environmental engineering which involves the improvement of the natural environment or remediation of polluted sites In addition it discusses bioprocess engineering involving the development of processes for the manufacture of products from biological materials to produce a valuable bioproduct This book covers knowledge on sources impacts and applications of industrial effluents that could potentially be used as feedstock for the IEB with examples of applied research that demonstrates the relationship between the effluents biorefinery treatment and bioproduct recovery Materials that can be produced from IEB and the treatment processes for such are considered Provides industrial effluents source characteristics and treatment Assists in designing an optimization strategy for maximizing efficiency of waste treatment and of bioresource utilization in terms of economic environmental and social impact Explains bio based product recovery for a bio based economy Discusses advanced processes for simultaneous industrial effluents treatment and the generation of bio based products of sufficient value **Intelligent Polymers for Nanomedicine and Biotechnologies** Magdalena

Aflori, 2017-08-14 Almost all synthetic materials over time induce some level of inflammation and fibrosis Therefore even though the successes of biomaterials science in producing acceptable solutions to the problem of biocompatibility have been remarkable there remains enormous opportunity for improvement The goal is the development of intelligent materials that replicate and mimic the ability of tissues and biological materials to adapt and renew This book describes the synthesis and the analysis of new smart polymeric materials and their practical implications in nanomedicine and biotechnology It offers a comprehensive overview gathering recent and innovative research on multiple aspects within the field of smart polymeric materials that offer new perspectives in developing current advanced biotechnologies The text contains both experimental and theoretical issues that reflect the impact of the materials characteristics in target applications It deals with recent advances in the design of new polymeric materials for advanced applications but also on the study of their structure properties relationship in order to move from completely inert static structures to flexible ones capable to respond to environmental changes Integrated Life-Cycle and Risk Assessment for Industrial Processes and Products Guido

Sonnemann, Michael Tsang, Marta Schuhmacher, 2018-10-10 Life cycle assessment is a methodology used to evaluate the environmental impacts of a product process or service during its life cycle and risk assessment is a tool to evaluate potential hazards to human health and the environment introduced by pollutant emissions The United Nations Sustainable Development Goals call for among other objectives responsible consumption and production by decoupling environmental resource use and environmental impacts from economic growth and human well being Life cycle assessment and risk assessment are both analytical system approaches that allow scientists and other decision makers to address these issues and objectives according to the current understanding of environmental mechanisms This book is the first attempt to

illustrate the existing interfaces between life cycle assessment and risk assessment and to indicate options for further integration of both tools The second edition Focuses on sustainability Considers new developments in life cycle assessment and environmental risk assessment over the last ten years at the international level Introduces broader concepts and discussions on integrative versus the complementary use of life cycle and risk assessments Extends the scope of integrated life cycle and risk assessments to critical raw materials Includes more case studies and discusses engineered nanomaterials Featuring contributions from leading experts Integrated Life Cycle and Risk Assessment for Industrial Processes and Products is a great reference for graduate students and professionals in environmental management and intends to catalyze communication between life cycle assessment and risk assessment experts and scientists in academia industry and governmental agencies The practical format of the book illustrated with flowcharts examples exercises and concrete applications makes it a useful manual for analyzing situations and making decisions
