Policymaking in India, 1947-2016 R. V. Vaidyanatha Ayyar, 2017-09-12 This book comprehensively chronicles the history of the education policymaking in India from 1947 to 2016 with a focus on the developments after 1964 when the Kothari Commission was constituted The book is informed by the rare insights acquired by the author while making policy at the state national and international levels of governance Another distinguishing feature of this book lies in the attention it pays to the process and politics of policymaking and the larger setting or to use jargon the political and policy environment in which policies were made at different points of time The author brings out a crucial analysis of the Indian educational system against the backdrop of national and global political economic and educational developments Two other distinguishing features of the book are the systematic treatment of the regulation of education and the role of judiciary in the making and implementation of education policies Contemporary India and Education Dr. Prachi Raizada, Dr. Madhavi Srivastava, Ram

Prakash, 2024-07-01 We are providing the e book of Contemporary India and Education of LU B Ed 4th semester Book in English as per Lucknow University Syllabus This book covered all syllabus *Education, Privatisation and Social Justice* Ian Macpherson, Susan Robertson, Geoffrey Walford, 2014-05-12 The involvement of private actors in education is not new yet in the last decade critical issues have arisen that demand close scrutiny This volume explores emerging forms of the private through case studies from Africa South Asia and South East Asia and makes three related observations First what is new about these manifestations is their scale scope and penetration into almost all aspects of the education endeavour from the administrative apparatus to policymaking and from formal provision in education settings to out of school activities such as private tutoring Second what is particularly controversial about these developments is how education itself is being recast as a sector it is increasingly being opened up to profit making and trade and to agenda setting by private commercial interests Third the learner is increasingly conceptualised as a consumer and education a consumer good The case studies therefore enable us to see more clearly how different forms of the private in education alter what is at stake for whom and with what outcomes and the consequences for individuals and societies In turn these raise the very important question about what they mean for our conceptualisations of education learning and teaching on the one hand and for education as a site and means for emancipation on the other These are profound social justice concerns and ones that make this volume distinctive This book sets out to address these hard but urgent questions and will be of interest to academics and students of education education researchers government personnel and policymakers *Biogenic Nano-Particles and their Use in*

Agro-ecosystems Mansour Ghorbanpour, Prachi Bhargava, Ajit Varma, Devendra K. Choudhary, 2020-03-20 Several nano scale devices have emerged that are capable of analysing plant diseases nutrient deficiencies and any other ailments that may

affect food security in agro ecosystems It has been envisioned that smart delivery systems can be developed and utilised for better management of agricultural ecosystems These systems could exhibit beneficial multi functional characteristics which could be used to assess and also control habitat imposed stresses to crops Nanoparticle mediated smart delivery systems can control the delivery of nutrients or bioactive and or pesticide molecules in plants It has been suggested that nano particles in plants might help determine their nutrient status and could also be used as cures in agro ecosystems Further to enhance soil and crop productivity nanotechnology has been used to create and deliver nano fertilizers which can be defined as nano particles that directly help supply nutrients for plant growth and soil productivity Nano particles can be absorbed onto clay networks leading to improved soil health and more efficient nutrient use by crops Additionally fertilizer particles can be coated with nano particles that facilitate slow and steady release of nutrients reducing loss of nutrients and enhancing their efficiency in agri crops Although the use of nanotechnology in agro ecosystems is still in its early stages and needs to be developed further nano particle mediated delivery systems are promising solutions for the successful management of agri ecosystems In this context the book offers insights into nanotechnology in agro ecosystems with reference to biogenic nanoparticles It highlights the occurrence and diversity of Biogenic Nanoparticles mechanistic approach involved in the synthesis of biogenic nanoparticles synthesis of nanoparticles using photo activation and their fate in the soil ecosystem potential applications of nanoparticles in agricultural systems application and biogenic synthesis of gold nanoparticles and their characterization impact of biogenic nanoparticles on biotic stress to plants mechanistic approaches involved in the antimicrobial effects and cytotoxicity of biogenic nanoparticles role of biogenic nanoparticles in plant diseases management relevance of biological synthesized nanoparticles in the longevity of agricultural crops design and synthesis of nano biosensors for monitoring pollutants in water soil and plant systems applications of nanotechnology in agriculture with special refer to soil water and plant sciences A useful resource for postgraduate and research students in the field of plant and agricultural sciences it is also of interest to researchers working in nano and biotechnology
