Subject: Thank You For Training Me for Cricket Match

Dear _____ (Name of the Recipient)

I am writing this letter to thank you for training me for today's match. I am grateful to you for being my cricket coach for the past 4 years. It is because of your efforts that I have become better at the sport. I could hit 104 runs in today's match and also contribute to my team's victory. I am glad to have a coach like you.

Even on days when I am not in a good form, you do not give up on me. You have also taught me the skill of never giving up. It is only because of your guidance and patience that I could make a place for myself in the _____ Team. Every time someone appreciates my game, I feel thankful to you for teaching me. I owe all my success to you.

I am grateful to have a hardworking coach like you. Thank you for training me to be great at the sport.

Sincerely,

(Signature)

Handbook of Clinical Behavior Therapy with the Elderly Client Patricia A. Wisocki, 2013-11-21 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population People over the age of 65 are also the fastest growing segment of the population in the United States

currently numbering 25 million The majority of older adults reside in their communities a small fraction of them are cared for in institutions Most may expect to experience some kind of physical impairment Approximately a quarter of the population may expect to suffer a mental health impairment While traditional therapies have not been especially effective for older adults behavior therapy has shown exceptional promise as a treatment modality This book presents a comprehensive explication of the relatively new field of behavioral gerontology It was written for the clinician interested in the interaction of medical environmental and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population
