The Listener, 1959 Punch Mark Lemon, Henry Mayhew, Tom Taylor, Shirley Brooks, Francis Cowley Burnand, Owen Seaman, 1921 *Music in Society* Ivo Supićić, 1987 The subject of this study has two distinct but not unrelated aspects first an investigation into the sociology of music as an autonomous and specialized discipline and second an examination of certain fundamental facts that may be considered within the purview of the sociology of music itself If an analysis and study even a preliminary one of these facts is to be properly focused and fruitful we must first try to determine the subject and methods of the sociology of music its position and boundaries in respect to musicology and most especially its relation to the aesthetics of music and music history It is equally indispensable to ascertain what the sociology of music as a separate scholarly discipline embraces where its investigation leads and finally to establish its position vis à vis sociology in general From the Author's Introduction Bibliographie nationale française, 1996 *Appeal to Expert Opinion* Douglas Walton, 2010-11-01 **Ad Hominem Arguments** Douglas Walton, 1998 A vital contribution to legal theory and media and civic discourse In the 1860s northern newspapers attacked Abraham Lincoln's policies by attacking his character using the terms drunk baboon too slow foolish and dishonest Steadily on the increase in political argumentation since then the argumentum ad hominem or personal attack argument has now been carefully refined as an instrument of opposition tactics and going negative by the public relations experts who craft political campaigns at the national level In this definitive treatment of one of the most important concepts in argumentation theory and informal logic Douglas Walton presents a normative framework for identifying and evaluating ad hominem or personal attack arguments Personal attack arguments have often proved to be so effective in election campaigns for example that even while condemning them politicians have not stopped using them In the media in the courtroom and in everyday confrontation ad hominem arguments are easy to put forward as accusations are difficult to refute and often have an extremely powerful effect on persuading an audience Walton gives a clear method for analyzing and evaluating cases of ad hominem arguments found in everyday argumentation His analysis classifies the ad hominem argument into five clearly defined subtypes abusive direct circumstantial bias poisoning the well and tu quoque you're just as bad arguments and gives methods for evaluating each type Each subtype is given a well defined form as a recognizable type of argument The numerous case studies show in concrete terms many practical aspects of how to use textual evidence to identify and analyze
