## **Rhino Poaching Grade 11 Memorandum:**

Transdex Index, 1994 An index to translations issued by the United States Joint Publications Research Service JPRS

Operation Lock and the War on Rhino Poaching John Hanks, 2015 The definitive account of a daring and controversial covert operation to stop the aggressive illegal trade in rhino horn in the 1980s      *Rhino Poaching* Janina Naef, 2016 Rhino horn is very popular in Asia as it is a status symbol and used as medicine That is one reason why the number of these animals is decreasing continuously In 2007 13 rhinos were poached in South Africa while in 2015 the number increased to 1175 rhinos This Matura Paper deals with problems of rhino poaching in South Africa It poses into the question if it is still possible to see rhinos in the future and examines what should be done to save this species from extinction Therefore 5 theses has been stated which consist of political financial protection measures and enlightenment of local and Asian people Thereby an interview has been conducted with a conservationist in addition to research in a volunteering project in South Africa regarding these theses The results prove the problems already stated If there are no changes in one of these problems the rhino doubtfully has a future      *Conservation of Rhinos and Reauthorization of the Sikes Act* United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Environment and Natural Resources, 1994

*Africa's Threatened Rhinos* Keith Somerville, 2025-01-14 Africa's surviving rhinos are under serious threat Poaching for their horns massive extermination by sports hunters in the nineteenth and first half of the twentieth century and progressive habitat loss have all driven black and white rhino close to the edge This book considers human interactions with these magnificent and enigmatic animals charting hunting for food and hides and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia With only two females alive in a closely protected reserve in Kenya the Northern White Rhino is on the brink of extinction The Southern White Rhino was increasing in numbers but poaching in South Africa Botswana and Namibia has now reduced the population to fewer than 20 000 while Black Rhino are hovering around the 6 000 6 500 mark also with the danger of extirpation everywhere but in parts of eastern and southern Africa Many books have been written on poaching and the decline of the rhino often from a very personal engaged viewpoint This volume takes the reader into important new territory showing how human agency has led to the situation we now face Covering the history of commercial and sporting exploitation of rhino it brings the picture up to date with an overview of contemporary conservation and anti poaching operations This urgent work is a significant contribution to our understanding of wildlife on the African continent      **The Economics of Rhino**

**Poaching** Michael Dawes, 2019      Ivory, Horn and Blood Ronald Orenstein, 2013-07-25 Meticulous research chilling facts an important and much needed book Dr Jane Goodall DBE Founder The Jane Goodall Institute If it is understanding you seek turn these pages Virginia McKenna OBE Founder The Born Free Foundation If you care about elephants and rhinos and the poaching onslaught that threatens their extinction in the wild this is the book for you Ian Redmond OBE Ambassador UN

Great Apes Survival Program As recently as ten years ago out of every ten African elephants that died four fell at the hands of poachers The figure today is eight Over sixty percent of Africa s Forest Elephants have been killed by poachers since the turn of the century Rhinoceroses are being slaughtered throughout their ranges The Vietnamese One horned Rhinoceros and the Western Black rhino have become extinct in the last decade and the Northern White Rhinoceros the largest of them all barely survives in captivity This alarming book tells a crime story that takes place thousands of miles away in countries that few of us may visit But like the trade in illegal drugs the traffic in elephant ivory and rhinoceros horn has far reaching implications not only for these endangered animals but also for the human victims of a world wide surge in organized crime corruption and violence Since the worldwide ban on commercial ivory trade was passed in 1989 after a decade that saw half of Africa s elephants slaughtered by poachers Ronald Orenstein has been at the heart of the fight Today a new ivory crisis has arisen fuelled by internal wars in Africa and a growing market in the Far East Seizures of smuggled ivory have shot up in the past few years Bands of militia have crossed from one side of Africa to the other slaughtering elephants with automatic weapons A market surge in Vietnam and elsewhere has led to a growing criminal onslaught against the world s rhinoceroses The situation for both elephants and rhinos is dire **Four Years for the Rhino** Kamalaja Kumbhara, 2012

*Development of a Rhino Anti-poaching Model for Game Farms and Nature Reserves in the Free State Province of South Africa* H.L. Jordaan, 2018 During the last ten years the rhino populations of South Africa have suffered under an intense poaching onslaught This onslaught has moved to the Free State Province of South Africa and there is a justified concern that its rhino populations are at risk To protect the rhinos in the Province a need exists to manage the risk of poaching through a practical rhino anti poaching model which can assist to protect them effectively This Rhino Anti Poaching Model can determine and predict a poaching risk can identify weaknesses can assist to address problem areas and will enable efficient monitoring It is imperative to know which rhino species occurred in the Free State Province in historical times to ensure that the correct rhino species is protected against the risk of poaching and that they be kept in a suitable habitat Nine farms in the Free State have rhino as a prefix in their names which may be an indication that rhino did occur in the Province Various historical photos and literature give a retrospective view and show that there was insufficient browsing vegetation for black rhinos to survive The occurrence of open grassland however suggests that white rhinos did occur in those specific areas during the time of the first pioneers During this study period a count of rhinos was done and currently there are 669 white rhinos and 11 black rhinos in the Province thus a total of 680 rhinos in the Free State Province The South African Constitution mandated the State to enforce measures that will ensure adequate environmental protection for the benefit of future generations The South African government promulgated a myriad of new environmental legislation Several international agreements were also introduced as enforcement tools to regulate rhinos The enforcement measures are noble but out of balance with many inspectors but too few law enforcement officials It also over regulates and ensnare officials in

minor issues A brief discussion on the latest technological innovations gives insight to the purpose of its development and effectiveness in combating rhino poaching There are currently no technical or strategic solutions to save rhinos from poaching therefore a combination of techniques is needed Although self manufactured unconventional devices seem to be more efficient to deceive poachers a combination with the latest technological equipment and conventional strategies might be the best solution to counter rhino poaching Free State rhino farmers own 90% of the Province s rhinos However these rhino farmers lack the appropriate security measures required to adequately protect their rhinos A questionnaire was developed and data were collected providing statistics on the current stance of security measures on rhino sites in the Province It showed that 80% of rhino poaching occurs in rhino camps bordering public roads 69% of the rhino sites located within 20km from the nearest town reported poaching and 77% of large rhino camps are prone to poaching incidents 57% of the respondents experienced rhino poaching on their sites Through the questionnaire it was gathered that rhino farmers in the Province are not vested in the concept of using trained rhino security A Production Loss Formula was constructed that calculates the production loss of a poached rhino

**Transnational Links in Rhino Poaching and the Black-Market Price of Rhino Horns** Adrian Lopes,2019 Rhino poaching in South Africa and India s major range states have been remarkably similar over time Organised criminal syndicates manage an illegal supply chain of rhino horns from poachers middlemen and corrupt authorities to East Asian black markets In this paper we use rhino poaching data from South Africa and India to examine the plausibility of transnational links and coordination in their supplies of rhino horns We develop an innovative model of oligopolistic collusion in supply and find empirical evidence to support the theory while controlling for rhino horn demand features corruption governance quality and conservation policy Furthermore we propose an inventory management model of a criminal syndicate that controls the horn supply chain The method retraces and forecasts black market prices and has potential applicability in estimating supply or demand elasticities This paper is the first to suggest an oligopolistic feature of the poaching industry It highlights the need to reorient conservation policy to account for possible coordination of rhino horn supplies between range states

**Economic Incentives and Poaching of the One-Horned Indian Rhinoceros in Nepal** Mahesh Poudyal,2005 Despite a relatively successful conservation programme for the endangered one horned rhinoceros in the National Parks of the Terai region poaching remains one of the major threats to its survival in Nepal In recent years there has been an alarming rise in the number of rhinos poached over 100 rhinos were taken in and around the Royal Chitwan National Park RCNP between 1998 and 2003 Although rhino poaching levels are influenced by the price of rhino horn on the international black market amongst a host of other socio economic factors there have not been any attempts to study the reasons behind poaching in Nepal using econometric models developed and applied elsewhere This study uses econometric models to explain changes in the level of poaching in the RCNP over a 30 year period Factors that are thought to influence the number of rhinos poached in the RCNP include i rhino population ii effectiveness of

anti poaching measures iii penalties for poaching iv availability of alternative economic opportunities i.e opportunity costs of poaching and v the price of rhino horn The results indicate that anti poaching units APUs in their original organisational and operational form were highly successful in controlling the level of poaching in the RCNP Furthermore the availability of local economic opportunities seemed to reduce the level of poaching significantly However the penalties imposed on the convicted poachers were found to have little or no effect on the level of rhino poaching in the RCNP The results also indicate a sharp rise in the number of rhinos poached during the years of the Maoist insurgency in the country compared to the years before Although the analysis is still very simplistic it provides valuable insights into the factors that have affected the level of poaching in the RCNP over the years It is hoped that these insights will be helpful in formulating effective policies to tackle rhino poaching especially in and around the RCNP where Nepal's largest population of one horned rhinoceros is found
