

Richard L Brandt

Matthew James McNees

Richard L Brandt :

One Click Richard L. Brandt, 2011-10-27 Amazon's business model is deceptively simple. Make online shopping so easy and convenient that customers won't think twice. It can almost be summed up by the button on every page: Buy now with one click. Why has Amazon been so successful? Much of it has to do with Jeff Bezos, the CEO and founder whose unique combination of character traits and business strategy have driven Amazon to the top of the online retail world. Richard Brandt charts Bezos's rise from computer nerd to world-changing entrepreneur. His success can be credited to his forward-looking insights and ruthless business sense. Brandt explains why Bezos decided to allow negative product reviews, correctly guessing that the earned trust would outweigh possible lost sales. Why Amazon zealously guards some patents yet freely shares others. Why Bezos called becoming profitable the dumbest thing they could do in 1997. How Amazon.com became one of the only dotcoms to survive the bust of the early 2000s. Where the company is headed next. Through interviews with Amazon employees, competitors, and observers, Brandt has deciphered how Bezos makes decisions. The story of Amazon's ongoing evolution is a case study in how to reinvent an entire industry and one that anyone in business today ignores at their peril.

The Google Guys Richard L. Brandt, 2011-06-28 How much do you really know about Google's founders, Larry Page and Sergey Brin? The Google Guys skips past the general Google story and focuses on what really drives the company's founders. Richard L. Brandt shows the company as the brainchild of two brilliant individuals and looks at Google's business decisions in light of its founders' ambition and beliefs. Larry is the main strategist with business acumen and practical drive, while Sergey is the primary technologist and idealist with brilliant ideas and strong moral positions. But they work closely together, almost like complementary halves of a single brain. Through interviews with current and former employees, competitors, partners, and senior Google management, plus conversations with the founders themselves, Brandt demystifies the company while clarifying a number of misconceptions.

Inside Larry and Sergey's Brain Richard L. Brandt, 2009 In the fourth book of the Inside the Brain series, Brandt examines the groundbreaking founders of Google, Larry Page and Sergey Brin. **Google: Company and Its Founders** Susan E. Hamen, 2011-01-01 This title examines the remarkable lives of Larry Page and Sergey Brin and their work building the groundbreaking company Google. Readers will learn about Page and Brin's backgrounds and education as well as their early careers. Also covered is a look at how Google operates and the issues the company faces, such as handling privacy and copyright lawsuits, facing competition, and developing new online user services. Color photos, detailed maps, and informative sidebars accompany easy-to-read compelling text. Features include a timeline, facts, additional resources, web sites, a glossary, a bibliography, and an index. *Technology Pioneers* is a series in Essential Library, an imprint of ABDO Publishing Company.

Sport Philosophy Now Matthew James McNees, 2015-12-24 In today's media-driven world, it seems there is always a scandal in the news involving athletes. Whether it's performance-enhancing drugs in cycling, domestic violence in football, or sexual assault in college athletics, new problems pop up as soon as old issues disappear. As we struggle

to understand and hopefully correct these problems we face the difficult reality that the lines between fact and fiction are often blurred by the media and sports governing bodies can be slow to make the necessary changes in their respective fields

In Sport Philosophy Now The Culture of Sports after the Lance Armstrong Scandal Matthew James McNees scrutinizes the current sports philosophy available and updates it in the post Lance Armstrong age While many philosophers have turned a blind eye to the realities of sport by focusing on ideologically driven abstract ideals this book offers an engaging alternative Examining the field primarily through the competitive world of cycling McNees explores such issues as authenticity in sport our tendency to create superficial high minded meaning from the actions of athletes and American capitalism in sports Other issues discussed include childhood play language and economics This book critiques the field of sports philosophy from its beginning offers a new paradigm for the field explains journalistic mistakes specifically through the lens of the Lance Armstrong scandal and sheds light on the mysteries of cycling s milieu of governing bodies and influential parties This book aims to inspire and support those who want to take up rigorous worthwhile and difficult questions in the field of sports philosophy It will be of interest not only to scholars but also to the cycling community and those who wish to learn more about the interactions between sports culture and philosophy [Google](#) Audrey DeAngelis,Gina DeAngelis,2018-12-15

[Google](#) studies how Sergey Brin and Larry Page working out of a garage created the world s most popular and powerful search engine that later grew into a multifaceted technology juggernaut Features include a glossary references websites source notes and an index Aligned to Common Core Standards and correlated to state standards Essential Library is an imprint of Abdo Publishing a division of ABDO **Air Force; the Official Service Journal of the U.S. Army Air Forces**,1940 **Robinson's Shiawassee County, Michigan Rural Directory** Robinson Directories,1974 **American Independent Inventors in an Era of Corporate R&D** Eric S. Hintz,2021-08-17 How America s individual inventors persisted alongside corporate R D labs as an important source of inventions During the nineteenth century heroic individual inventors such as Thomas Edison and Alexander Graham Bell created entirely new industries while achieving widespread fame However by 1927 a New York Times editorial suggested that teams of corporate scientists at General Electric AT T and DuPont had replaced the solitary garret inventor as the wellspring of invention But these inventors never disappeared In this book Eric Hintz argues that lesser known inventors such as Chester Carlson Xerox photocopier Samuel Ruben Duracell batteries and Earl Tupper Tupperware continued to develop important technologies throughout the twentieth century Moreover Hintz explains how independent inventors gradually fell from public view as corporate brands increasingly became associated with high tech innovation Focusing on the years from 1890 to 1950 Hintz documents how American independent inventors competed and sometimes partnered with their corporate rivals adopted a variety of flexible commercialization strategies established a series of short lived professional groups lobbied for fairer patent laws and mobilized for two world wars After 1950 the experiences of independent inventors generally mirrored the patterns of their predecessors and they

continued to be overshadowed during corporate R D s postwar golden age The independents enjoyed a resurgence however at the turn of the twenty first century as Apple s Steve Jobs and Shark Tank s Lori Greiner heralded a new generation of heroic inventor entrepreneurs By recovering the stories of a group once considered extinct Hintz shows that independent inventors have long been and remain an important source of new technologies

Laser Satellite Communication William H. Mott IV, Robert Sheldon, 2000-01-30 This introduction to the next generation of human telecommunications enterprise examines the development of laser satellite communications and describes its advantages over previous technologies It looks at the development of the technology and the industry through wired and wireless media and presents the vision promise and challenges of free space lasers The book balances its focused consideration of the telecommunications industry and markets with practical thoughts on creating a business involved in the introduction of commercial laser satellite communications systems Scholars investors venture capitalists policy makers and corporate leaders will find this to be a comprehensive and eye opening bridge between the existing telecommunications industry and the opportunities of the next generation The opening chapters introduce the concepts of Migration Specialization and Interconnectivity as solutions inherent in third generation laser satellite communications The high capacity of the optical spectrum invites migration of applications beyond the narrow RF spectra to the high frequencies of free space laser beams Migration stimulates specialization of voice and duplex at the lower optimal RF spectra The third generation laser wired space focuses around global satellite interconnectivity between fiber optics and RF The final chapters introduce a model business concept to pioneer the third generation Several approaches to capitalization organization technology development and business strategies provide an exciting stimulus for pragmatic approaches to commercial concepts
