## **Rural Development Putting The Last First World Development:**

**Rural Development** Robert Chambers, 2014-05-12 Rural poverty is often unseen or misperceived by outsiders Dr Chambers contends that researchers scientists administrators and fieldworkers rarely appreciate the richness and validity of rural people's knowledge or the hidden nature of rural poverty This is a challenging book for all concerned with rural development as practitioners academics students or researchers

**Fifty Key Thinkers on Development** David Simon, 2006 The essential guide to the world's most influential development thinkers this authoritative text presents a unique guide to the lives and ideas of leading contributors to the contested terrain of development studies Reflecting the diverse interdisciplinary nature of the area the book includes entries on modernisers like Hirshman Kindleberger and Rostow dependencistas such as Frank Cardoso and Amin progressives like Prebisch Helleiner and Streeten political leaders enunciating radical alternative visions of development such as Mao Nkrumah and Nyerere progenitors of religiously or spiritually inspired development such as Gandhi and Ariyaratne development environment thinkers like Blaikie Brookfield and Shiva This is a fascinating and readable introduction to the major figures that have shaped the field ideal for anyone studying or working in the area

*The Future of Rural Development* Hans Gsanger, 2005-06-28 This book gives a practitioner's account of international experiences with rural development seen from a German angle It argues for a development co operation for rural areas that actively supports popular participation beneficiaries self organization decentralization and consequently smaller self managed para projects rather than large top down organized rural development projects

*The Spirit of Development* Erica Bornstein, 2005 This book is an examination of the connections between modern economic practices globalization and contemporary Christian religious belief based on an ethnographic study of NGOs in Zimbabwe It addresses issues crucial for those interested in the strengths and weaknesses of development theory and practice as well as in Protestant Christianity as a transnational religion

*Making World Development Work* Grégoire Leclerc, Charles A. S. Hall, 2007-06-16 The authors reexamine world development usually the province of economists as professionals trained in the natural sciences They show how we have and might use tested scientific and technical procedures and concepts as well as science itself to achieve much better results than what has been characteristic of the past Leclerc and Hall contend that to scholars with a scientific background the process of development and the economic logic behind it often look almost surrealistic The basic question at the foundation of this review is this Why should something so important as world development something capable of absorbing such vast sums of money and of human goodwill something that impacts the people and the environment so much continue to be organized and planned using economic techniques and theories that are both unconfirmed experimentally and proven to have led to development failures

BOOK JACKET

Holocaust Escapees and Global Development David Simon, 2019-01-15 The thousands uprooted and displaced by the Holocaust had a profound cultural impact on the countries in which they sought refuge with numerous Holocaust escapees

attaining prominence as scientists writers filmmakers and artists But what is less well known is the way in which this refugee diaspora shaped the scholarly culture of their new found homes and international policy In this unique work David Simon explores the pioneering role played by mostly Jewish refugee scholars in the creation of development studies and practice following the Second World War and what we can learn about the discipline by examining the social and intellectual history of its early practitioners Through in depth interviews with key figures and their relatives Simon considers how the escapees experiences impacted their scholarship showing how they played a key role in shaping their belief that development really did hold the potential to make a better world free from the horrors of war genocide and discrimination they had experienced under Nazi rule In the process he casts valuable new light on the origins and evolution of development studies policy and practice from this formative postwar period to the present

Cultural Heritage Politics in China Tami Blumenfield, Helaine Silverman, 2013-05-14 This volume explores China's cultural heritage ideology and policies from three interrelated perspectives the State and World Heritage tourism cultural heritage tourism at undesignated sites and the cultural politics of museums and collections Something of a cultural heritage designation craze is happening in China This is new within even the last five to ten years Officials at many levels now see heritage preservation as a means for commoditizing their regions They are devoting new resources and attention to national and international heritage designations Thus addressing cultural heritage politics in a nation dedicated to designation is an important project particularly in the context of a rapidly growing economy This volume is also important because it addresses a very wide range of cultural heritage providing an excellent sample of case studies historic vernacular urban environments ethnic tourism scenic tourism pilgrimage as tourism tourism and economic development museums border heritage underwater remains and the actual governance and management of the sites This volume is an outstanding introduction to cultural heritage issues in China while contributing to Chinese studies for those with greater knowledge of the area

*The Participant* Christopher M. Kelty, 2020-01-21 Participation is everywhere today It has been formalized measured standardized scaled up network enabled and sent around the world Platforms algorithms and software offer to make participation easier but new technologies have had the opposite effect We find ourselves suspicious of how participation extracts our data or monetizes our emotions and the more procedural participation becomes the more it seems to recede from our grasp In this book Christopher M Kelty traces four stories of participation across the twentieth century showing how they are part of a much longer term problem in relation to the individual and collective experience of representative democracy Kelty argues that in the last century or so the power of participation has dwindled over time it has been formatted in ways that cramp and dwarf it even as the drive to participate has spread to nearly every kind of human endeavor all around the world *The Participant* is a historical ethnography of the concept of participation investigating how the concept has evolved into the form it takes today It is a book that asks Why do we participate And sometimes Why do we refuse

*Gender and Natural Resource Management* Bernadette P.

Resurrección, Rebecca Elmhirst, 2012-05-31 This book is about the gender dimensions of natural resource exploitation and management with a focus on Asia. It explores the uneasy negotiations between theory, policy and practice that are often evident within the realm of gender, environment and natural resource management, especially where gender is understood as a political, negotiated and contested element of social relationships. It offers a critical feminist perspective on gender relations and natural resource management in the context of contemporary policy concerns: decentralized governance, the elimination of poverty and the mainstreaming of gender. Through a combination of strong conceptual argument and empirical material from a variety of political, economic and ecological contexts including Cambodia, China, Indonesia, Malaysia, Nepal, Thailand and Vietnam, the book examines gender-environment linkages within shifting configurations of resource access and control. The book will serve as a core resource for students of gender studies and natural resource management and as supplementary reading for a wide range of disciplines including geography, environmental studies, sociology and development. It also provides a stimulating collection of ideas for professionals looking to incorporate gender issues within their practice in sustainable development. Published with IDRC.

*The Project in International Development* Caitlin Scott, 2023-06-26 The project has become fundamental to international development and humanitarian practice, playing a key role in defining objectives, funding streams and ultimately determining what success looks like. This book provides a much-needed overview of the project in international development practice, guiding the reader through the latest theoretical debates and exploring the core tools and stages of planning and design. The book starts with an overview of the role of the project through development history, before taking the reader through the stages of a standard project management cycle. Each chapter introduces the stage, the most common tools used to support that phase of planning and the critical debates that exist around it, with examples to illustrate discussions from around the world and a range of development fields. The book explores the challenges to working effectively in contemporary aid contexts, including the role of politics and the pressures wrought by the demands to demonstrate quantified results. Throughout, the book argues for the need to see the project as a form of governmentality that arranges resources and people in time and space and that extends neoliberal forms of managerial control in the sector. Ending with suggestions for innovation, this book is perfect for anyone looking for an accessible and engaging guide to the international development project, whether student, researcher or practitioner.

**Introduction to the Sociology of Development** Andrew Webster, 1990-03-01 This text provides a comprehensive introduction to the latest debates in the sociology of development, linking theoretical and empirical issues of social change, primarily though not exclusively through reference to the Third World. This book covers general conceptions of modernisation and underdevelopment and points to new attempts at their synthesis, as well as exploring the policy implications of different development models.

ICTs for Global Development and Sustainability: Practice and Applications Steyn, Jacques, Van Belle, Jean-Paul, Mansilla, Eduardo Villanueva, 2010-09-30 This book unites the theoretical underpinnings and scientific methodology of an approach of deploying

ICT in marginalized communities to bridge the so called digital divide This book contains case studies of Asia Africa Latin America and the Caribbean that demonstrate which approaches work and which do not in deploying public access to information sources Provided by publisher **Empowering Marginal Communities with Information Networking** Rahman, Hakikur,2005-11-30 This book details how new technologies can help people living in poverty improve their livelihood increase productivity improve the quality of services and empower them if technologies are used in ways that are appropriate to their context and needs Provided by publisher **Research and Fieldwork in Development** Daniel Hammett, Chasca Twyman, Mark Graham,2014-12-08 Research and Fieldwork in Development explores both traditional and cutting edge research methods from interviews and ethnography to spatial data and digital methods Each chapter provides the reader with an understanding of the theoretical basis of research methods reflects upon their practice and outlines appropriate analysis techniques The text also provides a cutting edge focus on the role of new media and technologies in conducting research The final chapters return to a set of broader concerns in development research providing a new and dynamic set of engagements with ethics and risk in fieldwork integrating methods and engaging development research methods with knowledge exchange practices Each chapter is supported by several case studies written by global experts within the field documenting encounters and experiences and linking theory to practice Each chapter is also complimented by an end of chapter summary suggestions for further reading and websites and questions for further reflection and practice The text critically locates development research within the field of international development to give an accessible and comprehensive introduction to development research methods This book provides an invaluable overview to the practice of international development research and serves as an essential resource for undergraduate and postgraduate student embarking of development fieldwork It is supported by online resources including extended bibliographies for each chapter example risk and ethic forms example policy briefing notes research reports links to websites and data sources

**Revolutions in Development Inquiry** Robert Chambers,2012-05-04 Robert Chambers returns with a new book that reviews together for the first time some of the revolutionary changes in the methodologies and methods of development inquiry that have occurred in the past forty years and reflects on their transformative potential for the future This book breaks new ground by describing and analysing the evolution of a sequence of approaches Starting with the dinosaurs of large scale multi subject questionnaire surveys and the biased visits and perceptions of rural development tourism and urban based professionals there follows a look at the explosive proliferation of methodologies and methods of recent years These include rapid rural appraisal RRA participatory rural appraisal PRA and dramatic developments in the still largely unrecognized fields of participatory numbers and statistics and of participatory mapping and GIS Chambers shows how these can empower local people and provide rigorous and valid substitutes for some more traditional methods of inquiry Also presented is a repertoire for offsetting the biases of the urban trap which has become so serious for officials and aid agency

staff Importantly Chambers points out that we are now in a different space methodologically from a few years ago He makes the case that participatory methodologies evolved through creative and eclectic pluralism can be a transformative wave for the future as drivers of personal professional and institutional change This book is for all who are concerned with development regardless of profession discipline or organization who seek to be abreast of the revolutionary breakthroughs in approaches and methods of inquiry of recent years and what Chambers calls their unlimited potentials Published with IDS

**Understanding Global Development Research** Gordon Crawford, Lena Kruckenberg, Nicholas Loubere, Rosemary Morgan, 2017-01-26 For experienced and inexperienced researchers and practitioners alike this engaging book opens up new perspectives on conducting fieldwork in the Global South Following an inter disciplinary and inter generational approach Understanding Global Development brings into dialogue reflections on fieldwork experiences by leading scholars along with accounts from early career researchers Contributions are organised around six key issues Meaningful participation in fieldwork Working in dangerous environments Gendered experiences of fieldwork Researching elites Conducting fieldwork with marginalised people Fieldwork in development practice The experience led discussion of each of the topics conveys a sense of what it actually feels like to be out in the field and provides readers with useful insights and practical advice A relational framework highlights issues relating to power identity and ethics in development fieldwork and encourages reflection on how researcher engagement with the field shapes our understanding of global development

**A Clash of Paradigms: Response and Development in the South Pacific** Suan Maiava, 2024-11-01 This title was first published in 2001 This study indicates that researchers have far to go in understanding and assessing how development projects work The author shows that often the perception of failure is not shared by those whom were intended to benefit She uses a case study of Samoan villagers introduced to cattle farming to examine the wider development process and challenge the conventional theories By drawing on people centred perspectives that give much greater weight to the role of culture in development the volume does not simply criticize development project management but suggests practical and positive ways forward encouraging spontaneous indigenous development which should be supported by projects where appropriate

**Geographies of Development** Robert Potter, Tony Binns, Jennifer Elliott, Etienne Nel, David Smith, 2019-03-07 Now in its fourth edition Geographies of Development An Introduction to Development Studies remains a core balanced and comprehensive introductory textbook for students of Development Studies Development Geography and related fields This clear and concise text encourages critical engagement by integrating theory alongside practice and related key topics throughout It demonstrates informatively that ideas concerning development have been many and varied and highly contested varying from time to time and from place to place Clearly written and accessible for students who have no prior knowledge of development the book provides the basics in terms of a geographical approach to development what situation is where when and why Over 200 maps charts tables textboxes and pictures break up the text and offer alternative ways of

showing the information The text is further enhanced by a range of pedagogical features chapter outlines case studies key thinkers critical reflections key points and summaries discussion topics and further reading Geographies of Development continues to be an invaluable introductory text not only for geography students but also anyone in area studies international studies and development studies **Inclusive Aid** Leslie Christine Groves, Rachel Barbara Hinton, 2013 Rapid and profound changes are taking place in international development The past two decades have promoted the ideals of participation and partnership yet key decisions affecting people's lives continue to be made without sufficient attention to the socio political realities of the countries in which they live Embedded working traditions vested interests and institutional inertia mean that old habits and cultures persist among the development community Planning continues as though it were free of unpredictable interactions among stakeholders This book is about the need to recognise the complex non linear nature of development assistance and how bureaucratic procedures and power relations hinder poverty reduction in the new aid environment The book begins with a conceptual and historical analysis of aid exposing the challenges and opportunities facing aid professionals today It argues for greater attention to accountability and the adoption of rights based approaches In section two practitioners policy makers and researchers discuss the realities of power and relationships from their experiences across sixteen countries Their accounts from government donors and civil society expose the highly politicised and dynamic aid environment in which they work Section three explores ways forward for aid agencies challenging existing political institutional and personal ways of working Authors describe procedural innovations as strategic ways to leverage change Breaking the barriers to ensure more inclusive aid will require visionary leadership and a courageous commitment to change Crucially the authors show how translating rhetoric into practice relies on changing the attitudes and behaviours of individual actors Only then is the ambitious agenda of the Millennium Development Goals likely to be met The result is an indispensable contribution to the understanding of how development assistance and poverty reduction can be most effectively delivered by the professionals and agencies involved **The Fisheries Co-management Experience** Douglas Clyde Wilson, Jesper Raakjaer Nielsen, Poul Degnbol, 2013-03-09 For two decades the idea of governments and fishers working together to manage fisheries has been advocated questioned disparaged and most importantly attempted in fisheries from North and South America through Europe Africa Asia and Oceania This book is the first time these experiences have been pulled together in a single volume summarized and explained The Fisheries Co management Experience begins with a review of the intellectual foundations of the co management idea from several professional perspectives Next fisheries researchers from six global regions describe what has been happening on the ground in their area Finally the volume offers a set of reflections by some of the best authors in the field The end result describes both the state of the art and emerging issues for one of the most important trends in natural resources management
