Jonsson,2012-05-22 Code switching or the alternation of languages by bilinguals has attracted an enormous amount of attention from researchers However most research has focused on spoken language and the resultant theoretical frameworks have been based on spoken code switching This volume presents a collection of new work on the alternation of languages in written form Written language alternation has existed since ancient times It is present today in a great deal of traditional media and also exists in newer less regulated forms such as email SMS messages and blogs Chapters in this volume cover

both historical and contemporary language mixing practices in a large range of language pairs and multilingual communities. The research collected here explores diverse approaches including corpus linguistics, Critical Discourse Analysis, literacy studies, ethnography, and analyses of the visual/textual aspects of written data. Each chapter, based on empirical research of multilingual writing, presents methodological approaches as models for other researchers. New perspectives developed in this book include analysis specific to written rather than spoken discourse, approaches from the new literacy studies treating mixed language literacy from a practice perspective, a focus on both traditional and new media types, and the semiotics of both text and the visual environment.

Writing Systems and Phonetics Alan Cruttenden, 2021-03-16. *Writing Systems and Phonetics* provides students with a critical understanding of the writing systems of the world. Beginning by exploring the spelling of English including how it arose and how it works today, the book goes on to address over 60 major languages from around the globe and includes detailed descriptions and worked examples of writing systems which foreground the phonetics of these languages. Key areas covered include the use of the Latin alphabet in and beyond Europe, writing systems of the eastern Mediterranean, Greek and its Cyrillic offshoot, Arabic and Hebrew languages in south and south east Asia including Hindi, Tamil, Burmese and Thai as well as in east Asia including Chinese, Japanese and Korean, reflections on ancient languages such as Sumerian, Egyptian, Linear B and Mayan, a final chapter which sets out a typology of writing systems. All of the languages covered are contextualised by authentic illustrations including road signs, personal names and tables to demonstrate how theoretical research can be applied to the real world. Taking a unique geographical focus that guides the reader on a journey across time and continents, this book offers an engaging introduction for students approaching for the first time the phonetics of writing systems, their typology and the origins of scripts.
