involve academic achievement but also students responses to different task demands as well as non academic characteristics such as learning motivation or school anxiety Closely associated with the investigation of teachers assessment competences and more specifically the investigation of conditions associated with high quality of assessments is the development and evaluation of teacher training programs to improve professional competences In recent years there has been considerable progress in the domain of professional teacher training however only a very limited number of studies are dedicated to the question to what extend training programs might offer valuable approaches to improve the quality of assessments and to implement high assessment competences Another important field which is closely related to teachers competences concerns the question how teachers professional development is linked to students learning and learning outcomes In recent years the societal demand for evidence that teachers professional development will result in improved student learning outcomes is increasing This volume brings together questions on assessment training and learning in the professional development of teachers which have not been fully discussed yet The identification of these research gaps was the reason for dedicating a series of lectures given at the University of Luxembourg 2012 to the topic of professionalization of teachers in these domains Therefore this book contains contributions from outstanding international scholars in different academic disciplines to present ideas about open research questions concerning the domains of assessment training and learning in the professional development of teachers

Creemers, Leonidas Kyriakides, Panayiotis Antoniou, 2012-11-05 This book makes a major contribution to knowledge and theory by drawing implications of teacher effectiveness research for the field of teacher training and professional development The first part of the book provides a critical review of research on teacher training and professional development and illustrates the limitations of the main approaches to teacher development such as the competence based and the holistic approach A dynamic perspective to policy and practice in teacher training and professional development is advocated The second part of the book provides a critical review of research on teacher effectiveness The main phases of this field of research are analysed It is pointed out that teacher factors are presented as being in opposition to one another An integrated approach in defining quality of teaching is adopted The importance of taking into account findings of studies investigating differential teacher effectiveness is argued Another significant limitation of this field of research is that the whole process of searching for teacher effectiveness factor was not able to have a significant impact upon teacher training and professional development For this reason it is advocated that teacher training and professional development should be focused on how to address grouping of specific teacher factors associated with student learning and on how to help teachers improve their teaching skills by moving from using skills associated with direct teaching only to more advanced skills concerned with new teaching approaches and differentiation of teaching The book refers to studies conducted in different countries illustrating how the proposed approach can be used by policy and practice in teacher education Specifically the

book provides evidence supporting the validity of the theoretical framework upon which this approach is based Moreover experimental and longitudinal studies supporting the use of this approach for improvement purposes are presented and suggestions for further research utilising and expanding the Dynamic Approach for teacher training and professional development are provided
