

This report is separated into paragraphs, which each give information about a particular aspect of the animal. The topic of each paragraph is made clear by the sub-headings.

Thinking about the information you have about your animal, what **sub-headings** could you use in your report?

What is a sloth?

A sloth is a mammal found in the rainforests of Central and South America. There are two types of sloth – two-toed sloths and three-toed sloths.

Appearance

Sloths have long, hairy, round heads and thick skin. They have long, sharp claws for climbing trees and hanging from branches. Their fur often has a green, moss-like growth, the same that grows on it. The sloth can help camouflage the body, and hair in their patches can be maple, cedar and eucalypt.

Habitat

Sloths are arboreal animals – this means that they spend most of their time in trees. They eat, sleep and even give birth hanging upside down from branches. They only come down from the trees to go to the toilet.

Diet

Sloths mostly eat leaves, fungi, buds and shoots, but they have been known to occasionally eat insects and birds. They have an extremely slow digestion process about 10% of most of their body's energy – the rest is used to keep it hot to fully digest.

Movement

Sloths move extremely slowly. They crawl through the trees at an average speed of just a centimetre a minute, and can hold their grip on the ground. They are fearless, and occasionally will run down up to three miles from their nests.

Did you know...?

- Sloths can hold their breath underwater for 40 minutes!
- Sloths only give birth to one cub a day.
- They can go for weeks without a meal.
