Effect of Daphnia swarm density on the attack rate of a predator fish, the stickleback

Category: Life Sciences

Introduction

For animals, living in groups offer many advantages. One of them is the protection against predators. For example, more individuals there are in a group, the greater the chances of detecting the approach of a predator. Also, the more individual there are, the harder it may be to the predator to concentrate on just one and successfully catch it. In the same way that it is difficult for a person to catch a ball when a dozen are thrown at him or her at the same time, it may be confusing for a predator to capture a particular prey when a great number of them are milling around overtaking one another or moving in all directions.

On the other hand, dense groups may be more easy to detect by predators and may therefore draw more attacks upon themselves. Therefore, it may be hard to predict whether prey should aggregate in dense groups or in less dense ones. It is also unclear what the predator itself should do: go for the dense group because of great number of prey there, or for the small group because of the ease of catching prey without getting confused.

In this experiment, we tested whether the three-spined stickleback, *Gasterosteus aculeatus*, which is a predator of the *Daphnia* (also called the water flea), prefers to attack big or small groups of its prey.

Method

In the Fall, we captured six three-spined sticklebacks with minnow traps in a small tidal pool along the petitecodiac River near Moncton. Four were females and two were males. They were kept together in a 40-liter aquarium filled with freshwater. We also obtained *Daphnia* by filtering water from a freshwater pond. Some of these *Daphnia* were given to the sticklebacks to get them used to this kind of prey.. All tests took place in a separate 40 liter aquarium covered with gravel at the bottom and with the water temperature varying between 15 and 20. One of the six sticklebacks was placed in this aquarium and given time to get used to these new surroundings. Then a row of three test tubes were lowered into the aquarium. Each tube was 10cm long, 2 cm wide, and separated from its neighbour by 15 cm. One tube contained 40 *Daphnia*, the second contained 10 *Daphnia*, and the last one contained 2 *Daphnia*.

Encyclopedia of DNA and the United States Criminal Justice

System Louis J. Palmer, Jr., 2024-10-17 Forensic DNA analysis was first introduced to the American criminal justice system in the mid 1980s. Since then, DNA testing has become the leading forensic tool both for obtaining sexual assault criminal convictions and for establishing the innocence of criminal suspects and wrongfully convicted defendants. This encyclopedia provides straightforward information on the role of DNA in the American courts. Entries explain the relationship of forensic DNA analysis to microbiology, population genetics, statistics, and the legal rules of the admissibility of scientific evidence. Full texts preceded by summaries are presented of all the statutes created by the states and the federal government that address the forensic use of DNA analysis and the edited text of judicial case opinions that address specific DNA issues. There are many entries on organizations that use DNA testing to free wrongly convicted defendants and on individuals who were released from prison many from death row after DNA tests proved their innocence.

Contemporary Business Report Writing Shirley Kuiper, Gary F. Kohut, 1999. This text takes a developmental process approach to the crafting of various business reports with the idea that business reports from basic reports to feasibility studies, business plans, and employee manuals are vital tools in business decision making. Beginning with the fundamentals of writing, students are taken through the process of drafting, revising, editing, and producing simple reports as well as planning and conducting research which culminates in a well-prepared report. Once report preparation and writing is mastered, presentation techniques and skills are discussed so students learn to effectively communicate the information contained in their reports.
