Karl J. Puttlitz, Paul A. Totta, 2012-12-06 Microelectronic packaging has been recognized as an important enabler for the solid state revolution in electronics which we have witnessed in the last third of the twentieth century Packaging has provided the necessary external wiring and interconnection capability for transistors and integrated circuits while they have gone through their own spectacular revolution from discrete device to gigascale integration At IBM we are proud to have created the initial simple concept of flip chip with solder bump connections at a time when a better way was needed to boost the reliability and improve the manufacturability of semiconductors The basic design which was chosen for SLT Solid Logic Technology in the 1960s was easily extended to integrated circuits in the 70s and VLSI in the 80s and 90s Three I O bumps have grown to 3000 with even more anticipated for the future The package families have evolved from thick film SLT to thin film metallized ceramic to co fired multi layer ceramic A later family of ceramics with matching expansivity to silicon and copper internal wiring was developed as a predecessor of the chip interconnection revolution in copper multilevel submicron wiring Powerful server packages have been developed in which the combined chip and package copper wiring exceeds a kilometer All of this was achieved with the constant objective of minimizing circuit delays through short efficient

interconnects Engineers for Korea Kyonghee Han, Gary Downey, 2013-04-01 The engineer is bearer of the nation's industrialization says the tower pictured on the front cover President Park Chung hee 1917-1979 was seeking to scale up a unified national identity through industrialization with engineers as iconic leaders But Park encountered huge obstacles in what he called the second economy of mental nationalism Technical workers had long been subordinate to classically trained scholar officials Even as the country became an industrial powerhouse the makers of engineers never found approaches to techno national formation engineering education and training that Koreans would wholly embrace This book follows the fraught attempts of engineers to identify with Korea as a whole It is for engineers both Korean and non Korean who seek to become better critical analysts of their own expertise identities and commitments It is for non engineers who encounter or are affected by Korean engineers and engineering and want to understand and engage them It is for researchers who serve as critical participants in the making of engineers and puzzle over the contents and effects of techno national formation
