Theoretical Perspectives on Family Businesses Mattias Nordqvist, Leif Melin, Matthias Waldkirch, Gershon

Kumeto, 2015-07-31 Family business has become an increasingly studied field over the last decade and forms one of the fastest growing research areas today. The uniqueness of family business is the interaction between two systems: the family and the firm, leading to specific characteristics. Family Businesses in Sub-Saharan Africa Moses Acquah, 2016-06-29 This book is the first of its kind to highlight the importance of family businesses to economic growth in sub-Saharan Africa. It examines the managerial, behavioral, and strategic issues facing these companies and offers conclusive statements about their performance and influence on the region. Family businesses have been found to outperform non-family businesses in advanced industrialized economies, yet no such information exists on the importance of these companies, which dominate the economic landscape of sub-Saharan Africa. Through empirical evidence and cross-country data, a team of expert contributors explore matters related to the management of family-owned businesses, such as how they evaluate employee productivity and performance, manage human resources, view governance practices, and the role of women and other sensitive issues. This is a seminal text for students and researchers in family business, entrepreneurship, strategic management, and family business owners looking to improve and advance their companies for the greater good of sub-Saharan Africa and the rest of the continent.

Ambidextrous global strategy (AGS) is crucial for global firms in the turbulent twenty-first century. Here, AGS is defined as simultaneous achievements of global integration and local adaptation or responsiveness through utilization of a firm's core facilities and organizational capabilities. Distinctive features of the book include: first, a framework of ambidextrous innovation and AGS; second, analyses of examples of many industries to implement ambidexterity strategies, including Korean shipbuilding firms, Korean and Japanese steel firms, LCD panel flat glass manufacturers, Japan's trucking industry, agricultural corporations, and other Japanese manufacturing firms. Finally, the book focuses on effective ambidextrous business strategies for the digital transformation era with the integration of open and closed innovation.
