Scope For Afrikaans Paper 2:

South African Scope, 1973 **The scope of lexical rules** M. Moortgat, H. v. d. Hulst, T. Hoekstra, 2020-10-26 No detailed description available for The scope of lexical rules **Extending the Scope of Corpus-Based Translation Studies** Sylviane Granger, Marie-Aude Lefer, 2022-01-27 With the rapid growth of corpus based translations studies CBTS over recent years this book offers a timely overview of the field today It features cutting edge studies from leading experts in the area focused on both professional and student translations and covers the latest theoretical developments such as the constrained communication framework with a strong focus on methodology particularly mixed method approaches multivariate research designs and translation error annotation The volume highlights the emerging interdisciplinary bridges between CBTS and other areas in linguistics and demonstrates the applications of these theories and methods to translator training It also offers a forward looking perspective by presenting some of the challenges CBTS currently faces and possible pathways for future research Thanks to its combined theoretical methodological and applied perspective and innovative approaches Extending the Scope of Corpus Based Translation Studies will appeal to both seasoned specialists and newcomers to the field Logic, Language, and Computation Helle Hvid Hansen, Sarah E. Murray, Mehrnoosh Sadrzadeh, Henk Zeevat, 2017-02-21 This book constitutes the refereed proceedings of the 11th International Tbilisi Symposium on Logic Language and Computation TbiLLC 2015 held in Tbilisi Georgia in September 2015 The 18 papers in this book were selected from the invited submissions of full revised versions of the 37 short papers presented at the conference and one invited talk Each paper has passed through a rigorous peer review process before being accepted for publication The biennial conference series and the proceedings are representative of the aims of the organizing institutes to promote the integrated study of logic information and language The scientific program consisted of tutorials invited lectures contributed talks and two workshops **The Composition of Meaning** Alice ter Meulen, Werner Abraham, 2004-10-31 In the modular design of generative theory the syntax semantics interface has accounted all along for meanings at the level of Logical Form The syntax pragmatics interface on the other hand is the result of what one may call the pragmatic turn in the linguistic theory where content is partitioned into given and new information In other words the structural division of the clause has been subjected to criteria of information or discourse structure Both interfaces require a structurally descriptive inventory whose specific shapes can be motivated on theory internal grounds only The present collection of original articles develops the concept of these interfaces further The papers in the first section focus on the syntax semantics interface those in the second section on the syntax pragmatics interface **Triggers** Anne Breitbarth, Henk van Riemsdijk, 2008-08-22 The concept of trigger is a core concept of Chomsky's Minimalist Program The idea that certain types of movement are triggered by some property of the target position is at least as old as the notion that the movement of noun phrases to the subject position is triggered by their need to receive nominative case In more recent versions of syntactic theory triggering

mechanisms are thought to regulate all of movement Furthermore a quite narrow range of triggering mechanisms is permitted As is to be expected such a restrictive approach meets a variety of difficulties Specifically the question is whether all triggering elements required to cover displacement of all kinds in natural language can be independently motivated Further how can a trigger theory which crucially relies on the idea that all movement is obligatory deal with apparently optional movement processes Are features an adequate means to express the triggering function in all cases More radically are all movement phenomena really the result of the checking of trigger features And what about apparent triggering factors that are external to syntax such as prosody can they be captured in a rigid trigger theory In other words could certain aspects of triggered movement be due to interface conditions Such is the range of questions addressed by the fourteen contributions to this book They cover a considerable range of languages including Afrikaans Breton Bulgarian Dutch English French German Gungbe Hungarian Italian Japanese Kiswahili Romanian These papers present materials both empirical and theoretical that will not fail to have considerable impact on the further development of the concept of trigger in syntactic theory

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience

Human Abilities in Cultural Context S. H. Irvine,John W. Berry,1988-09-30 Originally published in 1988 Human Abilities in Cultural Context constituted a major development in conceptualising and studying human abilities It formed a unique reference frame This study offers a re evaluation of ability theory by the editors S H Irvine and J W Berry and strong individual statements by H J Eysenck Arthur R Jensen Joseph R Royce and Robert J Sternberg who represent markedly different approaches to the measurement of intelligence It also focuses on contexts in which the limits of assessment by psychological tests are defined in minority native groups in North America in migrants to Britain in lower caste enclaves in India among African minorities and among Australian Aborigines Written by long term residents of the regions in question these chapters presented a wealth of fresh data in relation to Western formulations of theory and practice

S.A. Pictorial ,1924 *Arguments and Structure* Teun Hoekstra,2008-08-22 This book contains 14 articles by Teun Hoekstra 1953 1998 on core issues in syntactic theory Some articles focus on the structure of DP others on the structure of the sentence as a whole while others still deal explicitly with the parallels between the two The papers are distributed over four sections Argument structure T chains The morpho syntax of verbal and nominal projections and Small clauses More than half of the articles in this book are published here for the first time or appear for the first time in English Hoekstra s work is characterized by a fundamental interest in the central questions of syntactic theory most notably the relation between argument structure and X bar structure This concentrated interest led to a deep understanding of the notion of transitivity with respect to both the status of the external argument and that of the internal argument where status refers to both the content and the licensing In this collection of papers Hoekstra reports on his insights in these matters As far as content and licensing of the external argument is concerned this collection contains papers on the relation between passives and their active counterparts the parallels between possessives and transitives and the differences and similarities between past participles and infinitives As to the internal argument we find papers addressing sentential complementation verbal affixation and resultatives And there is a whole section on tense and its role in keeping the sentence together One of the papers in this collection is Hoekstra s classic but hitherto unpublished Small clauses everywhere more than 70 pages which summarizes Hoekstra s views on such issues as resultatives particle verbs and double object constructions
