SCRAPS OF THE UNTAINTED SKY THOMAS. MOYLAN, 2019-06-14

Scraps Of The Untainted Sky Tom

Moylan, 2000-12-22 Dystopian narrative is a product of the social ferment of the twentieth century. A hundred years of war, famine, disease, state terror, genocide, ecocide, and the depletion of humanity through the buying and selling of everyday life provided fertile ground for this fictive underside of the utopian imagination. From the classical works by E. M. Forster, Yevgeny Zamyatin, Aldous Huxley, George Orwell, and Margaret Atwood through the new maps of hell in postwar science fiction and most recently in the dystopian turn of the 1980s and 1990s, this narrative machine has produced challenging cognitive maps of the given historical situation by way of imaginary societies which are even worse than those that lie outside their authors and readers' doors. In *Scraps of the Untainted Sky*, Tom Moylan offers a thorough investigation of the history and aesthetics of dystopia. To situate his study, Moylan sets out the methodological paradigm that developed within the interdisciplinary fields of science fiction studies and utopian studies as they grow out of the oppositional political culture of the 1960 and 1970s, the context that produced the project of cultural studies itself. He then presents a thorough account of the textual structure and formal operations of the dystopian text. From there, he focuses on the new science fictional dystopias that emerged in the context of the economic, political, and cultural convulsions of the 1980s and 1990s, and he examines in detail three of these new critical dystopias: Kim Stanley Robinson's *The Gold Coast*, Octavia Butler's *The Parable of the Sower*, and Marge Piercy's *He, She, and It*. With its detailed, documented, and yet accessible presentation, *Scraps of the Untainted Sky* will be of interest to established scholars as well as students and general readers who are seeking an in-depth introduction to this important area of cultural production.

Parasocial Politics Jason Zenor, 2014-10-21 The popularity of cable news satire documentaries and political blogs suggests that people are often absorbing and dissecting direct political messages from informational media. But entertainment media also discusses the important political issues of our time, though not as overtly. Nonetheless, consumers still learn, debate, and form opinions on important political issues through their relationship with entertainment media. While many scholarly books examine these political messages found in popular culture, very few examine how actual audiences read these messages. *Parasocial Politics* explores how consumers form complex relationships with media texts and characters and how these readings exist in the nexus between real and fictional worlds. This collection of empirical studies uses various methodologies, including surveys, experiments, focus groups, and mixed methods, to analyze how actual consumers interpret the texts and the overt and covert political messages encoded in popular culture.

Contemporary Anarchist Studies Randall Amster, Abraham DeLeon, Luis Fernandez, Anthony J. Nocella, II, Deric Shannon, 2009-02-10 This book highlights the recent rise in interest in anarchist theory and practice, attempting to bridge the gap between anarchist activism on the streets and anarchist studies in the academy. Bringing together some of the most prominent voices in contemporary anarchism in the academy, it includes pieces written on anarchist theory, pedagogy, methodologies, praxis, and the future.

University of Missouri St Louis USA Simon Spiegel's magisterial overview of utopian documentaries and nonfiction films is a treasure trove of information and unearths many forgotten and half forgotten films providing perceptive discussions of sidelined movies that deserve his and our critical scrutiny Eckart Voigt's University of Braunschweig Institute of Technology Germany This book is the first major study on utopias in nonfiction film Since the publication of Thomas More's *Utopia* more than 500 years ago countless books have been written which describe a better world But in film positive utopias seem to be nonexistent So far research has focused almost exclusively on dystopias since positive outlooks seem to run contrary to the media's requirement *Utopias in Nonfiction Film* takes a new approach starting from the insight that literary utopias are first and foremost meant as a reaction to the ills of the present and not as entertaining stories it looks at documentary and propaganda films an area which so far has been completely ignored by research Combining insights from documentary research and utopian studies a vast and very diverse corpus of films is analysed Among them are Zionist propaganda films cinematic city utopias socialist films of the future as well as web videos produced by the Islamist terrorist group ISIS

The (Un)Certain Future of Empathy in Posthumanism, Cyberculture and Science Fiction Elsa Bouet, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This volume investigates the future of empathy as contemplated by posthumanism cyberculture and science fiction As humanity increasingly networks and communicates online the reconfiguration of human communities through the removal and immediacy of the body challenges traditional notions of humanity and human capacity for empathy The impact of cyberculture and posthumanism on humanity and its capacity for empathy is here assessed through research in literature films neuroscience anthropology and philosophy This volume addresses the centrality of the body to human interactions and assesses how intrinsic it is to the defining of the human The exploration of posthuman narratives which display futuristic bodily modifications also engages with the anxieties and hopes for the future of human empathy Research in dystopian narratives shows that these anxieties are also expressed without the tropes of bodily modifications and that ideological distancing creates the conditions necessary for a lack of empathy towards otherness

Utopias and the Environment Geoffrey Berry, 2017-10-02

Utopias and the Environment explores the way in which the kind of dreaming or re-visioning known as the utopian imaginary takes environmental concerns into account This kind of creative intervention is increasingly important in an era of ecological crisis as we witness the failure of governments worldwide to significantly change industrial civilization from a path of business as usual In this context it is up to the artists in this case authors to imagine new ways of being that respond to this imperative and immediate global issue Concurrently it is also up to critics readers and thinkers everywhere to appraise these narratives of possibility for their complexities and internal conflicts as well as for their promise as we enter this new era of rapid change and adaptation Because creative and critical thinkers must work together towards this goal the idea of the critical utopia coined by Tom Moylan in response to the fiction of the 1970s is now ingrained in the common argot and is one of the key ideas discussed in this book This development in the genre which combines self-reflexivity and multiple perspectives within its dreaming represents the postmodern spirit in its most regenerative aspect This book is testament to such hopes and potential realities This book was originally published as a special issue of Green Letters
