Scrum Management Scrum Master And Product Owner Study:

Scrum Management Steen Lerche-Jensen, Cosmin Bogza, 2014-12-10 Before starting the first Sprint Alex is assigned as the Scrum Product Owner of a new software development project One of his first tasks is to start requirement engineering He writes down the most important use cases and discusses them with the architects customer representatives and other stakeholders After collecting the high level use cases and requirements he writes them into the Scrum Product Backlog and initiates an estimation and prioritization session with the architects and some senior developers As a result of this session all the items in the Scrum Product Backlog have an initial rough estimation and a prioritization Now he starts to break down the high level requirements into smaller grained user stories With this list he then calls for the first Sprint Planning meeting

The total of 7 full and 6 short papers presented in this volume were carefully reviewed and selected from a total of 45 submissions. The papers selected to be included in this book contribute to the understanding of relevant trends of current research on and future directions of information technology for management in business and public organizations. They were organized in topical sections named information technology assessment for future development methods and models for designing information technology and aspects of implementing information technology. Research Anthology on Decision Support Systems and Decision Management in Healthcare, Business, and Engineering Management Association, Information Resources, 2021-05-28. Decision support systems (DSS) are widely touted for their effectiveness in aiding decision making particularly across a wide and diverse range of industries including healthcare, business, and engineering applications. The concepts, principles, and theories of enhanced decision making are essential points of research as well as the exact methods, tools, and technologies being implemented in these industries. From both a standpoint of DSS interfaces, namely the design and development of these technologies along with the implementations, including experiences and utilization of these tools, one can get a better sense of how exactly DSS has changed the face of decision making and management in multi-industry applications. Furthermore, the evaluation of the impact of these technologies is essential in moving forward in the future. The Research Anthology on Decision Support Systems and Decision Management in Healthcare, Business, and Engineering explores how decision support systems have been developed and implemented across diverse industries through perspectives on the technology, the utilizations of these tools, and from a decision management standpoint. The chapters will cover not only the interfaces, implementations, and functionality of these tools but also the overall impacts they have had on the specific industries mentioned. This book also evaluates the effectiveness along with benefits and challenges of using DSS as well as the outlook for the future. This book is ideal for decision makers, IT consultants, and specialists, software developers, design professionals, academicians, policymakers, researchers, professionals, and students interested in how DSS is being used in different industries.
