Part 1: Performance Criteria for Cascaded and Other Error Codes** AEROSPACE CORP EL SEGUNDO CALIF.,1963 **Limited Magnitude Error Control Codes** Noha Elarief,2010 A relatively new model of error control is the limited magnitude error over high radix channels In this error model the error magnitude does not exceed a certain limit known beforehand In this dissertation we study systematic error control codes for common channels under the assumption that the maximum error magnitude is known a priori Optimal codes correcting all asymmetric and symmetric errors are given Further as it is often the case that we only need to correct a small number of errors codes that can correct a single error over asymmetric and symmetric channels are also proposed The designed codes achieve higher code rates than single error correcting codes previously given in the literature From the error detection point of view we study both all and t error detecting codes for asymmetric unidirectional channels and design close to optimal codes Finally we show how the all asymmetric error correcting codes proposed in this dissertation can be used to detect all symmetric errors
