Future Spacecraft Propulsion Systems and Integration Paul A. Czysz, Claudio Bruno, Bernd Chudoba, 2017-08-30 The updated and expanded third edition of this book focuses on the multi disciplinary coupling between flight vehicle hardware alternatives and enabling propulsion systems It discusses how to match near term and far term aerospace vehicles to missions and provides a comprehensive overview of the subject directly contributing to the next generation space infrastructure from space tourism to space exploration This holistic treatment defines a mission portfolio addressing near term to long term space transportation needs covering sub orbital orbital and escape flight profiles In this context a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access A best practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike

Climate Policy after the 2015 Paris Climate Conference Joanna Depledge, Jorge E. Viñuales, Emma Lees, David Reiner, 2021-12-14 The 2015 Paris Agreement marked a turning point in the global community's response to climate change For the first time almost all the world's nations put forward specific pledges to cut their greenhouse gas emissions with the aim of limiting global warming to well below 2°C and ideally 1.5°C The ten contributions in *Climate Policy after the 2015 Paris Climate Conference* provide a powerful and scholarly analysis of how this historic achievement came about With a new introduction providing an update on recent developments the other chapters in this book were originally published as a special issue of the journal *Climate Policy*
