Revolution Rebellion Resistance Book:

Revolution, Rebellion, Resistance Eric Selbin, In this ground breaking book Eric Selbin argues that we need to look beyond the economic political and social structural conditions to the thoughts and feelings of the people who make revolutions In particular he argues we need to understand the stories people relay and rework of past injustices as they struggle in the present toward a better future *Revolution, Rebellion, Resistance* Professor Eric Selbin, 2013-04-04 Why do revolutions happen Decades of social science research have brought us little closer to understanding where when and amongst whom they occur In this groundbreaking book Eric Selbin argues that we need to look beyond the economic political and social structural conditions to the thoughts and feelings of the people who make revolutions In particular he argues we need to understand the stories people relay and rework of past injustices and struggles as they struggle in the present towards a better future Ranging from the French Revolution to the Battle for Seattle via Russia China Cuba Vietnam and Nicaragua Selbin makes the case that it is myth memory and mimesis which create maintain and extend such stories *Revolution Rebellion Resistance* identifies four kinds of enduring revolutionary story Civilizing and Democratizing The Social Revolution Freedom and Liberation and The Lost and Forgotten which do more than report on events they catalyse changing the world **Handbook of Revolutions in the 21st Century** Jack A. Goldstone, Leonid Grinin, Andrey

Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume

demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra *Religion in Rebellions, Revolutions, and Social Movements* Warren S. Goldstein, Jean-Pierre Reed, 2022-05-19 Religion in Rebellions Revolutions and Social Movements demonstrates that while religion is often a social force that maintains if not legitimates the sociopolitical order it is also a decisive factor in economic social and political conflict The book explores how and under what conditions religion functions as a progressive and or reactionary force that compels people to challenge or protect social orders The authors focus on the role that religion has played in peasant slave and plebeian rebellions revolutions including the Chinese English French Russian and Iranian and modern social movements In addition to these case studies the book also contains theoretical chapters that explore the relationship religious thought has with the politics of liberation and oppression It examines the institutional organizational ritualistic discursive ideological and or framing mechanisms that give religion its oppressive and liberating structures Many scholars of religion continue very conventional modes of thinking ignoring how religion has been and continues to be both a hegemonic and counterhegemonic force in conflict This book looks at both sides of the equation This international and interdisciplinary volume will be of interest to students and scholars in the fields of politics of religion sociology of religion religious studies gender studies and history Youth Activism and Solidarity Gavin Brown, Helen Yaffe, 2017-10-16 From April 1986 until just after Nelson Mandela's release from prison in February 1990 supporters of the City of London Anti Apartheid Group maintained a continuous protest day and night outside the South African Embassy in central London This book examines how and why a group of children teenagers and young adults made themselves non stop against apartheid creating one of the most visible expressions of anti apartheid solidarity in Britain Drawing on interviews with over ninety former participants in the Non Stop Picket of the South African Embassy and extensive archival research using previously unstudied documents this book offers new insights to the study of social movements and young people's lives It theorises solidarity and the processes of adolescent development as social practices to provide a theoretically informed argument led analysis of how young activists build and practice solidarity Youth Activism and Solidarity The Non Stop Picket Against Apartheid will be of interest to geographers historians and a wide range of other social scientists concerned with the historical geography of the international anti apartheid movement social movement studies contemporary British history and young people's activism and geopolitical agency Crises of Imagination, Crises of Power Max Haiven, 2014-03-13 Today when it seems like everything has been privatized when austerity is too often seen as an economic or political problem that can be solved through better policy and when the idea of moral values has been commandeered by the right how can we re imagine the forces used as weapons against community solidarity ecology and life itself In this stirring call to arms Max Haiven argues that capitalism has colonized how we all imagine and express what is valuable Looking at the decline of the public sphere the corporatization of education the privatization of creativity and the

power of finance capital in opposition to the power of the imagination and the growth of contemporary social movements Haiven provides a powerful argument for creating an anti capitalist commons Capitalism is not in crisis it is the crisis and moving beyond it is the only key to survival Crucial reading for all those questioning the imposition of austerity and hoping for a fairer future beyond it [Message and Medium](#) Caroline Tagg,Mel Evans,2020-06-08 Studies of digital communication technologies often focus on the apparently unique set of multimodal resources afforded to users and the development of innovative linguistic strategies for performing mediatised identities and maintaining online social networks This edited volume interrogates the novelty of such practices by establishing a transhistorical approach to the study of digital communication The transhistorical approach explores language practices as lived experiences grounded in historical contexts and aims to identify those elements of human behaviour that transcend historical boundaries looking beyond specific developments in communication technologies to understand the enduring motivations and social concerns that drive human communication The volume reveals long term patterns in the indexical functions of seemingly innovative written and multimodal resources and the ideologies that underpin them and shows that methods are not necessarily contingent on their datasets historical analytic frameworks can be applied to digital data and newer approaches used to understand historical data These insights present exciting opportunities for English language researchers both historical and modern

Occupying Subjectivity Chris Rosedale,2017-10-02 This book explores a variety of forms of radical political subjectivity It takes its cue from the 2011 uprisings in the Middle East and North Africa the Occupy Movement and the European Anti Austerity Movement alongside the wider opposition to authoritarian and neoliberal forms of governance from which they sprang in order to ask an urgent series of questions about the subject of radical politics Who or what is it that engages in resistance Who or what should they be And how are we to negotiate the many complexities of that second question The contributions drawing on a wide range of theoretical traditions offer a rich series of provocations towards new ways of conceptualising evaluating and imagining radical political praxis They engage different kinds of subjects including protestors dancers self burners academics settlers and humans in order to think through the ways in which contemporary subjects are constituted within and work to unsettle dominant relations of power Together the chapters open up spaces to think about how political and intellectual commitment to social change can be enlivened through attention to the subject of radical politics This book was published as a special issue of Globalizations [From Rebel to Ruler](#) Tony Saich,2021-07-06 On the centennial of the founding of the Chinese Communist Party the definitive history of how Mao and his successors overcame incredible odds to gain and keep power Mao Zedong and the twelve other young men who founded the Chinese Communist Party in 1921 could hardly have imagined that less than thirty years later they would be rulers On its hundredth anniversary the party remains in command leading a nation primed for global dominance Tony Saich tells the authoritative comprehensive story of the Chinese Communist Party its rise to power against incredible odds its struggle to consolidate rule

and overcome self inflicted disasters and its thriving amid other Communist parties collapse Saich argues that the brutal Japanese invasion in the 1930s actually helped the party As the Communists retreated into the countryside they established themselves as the populist grassroots alternative to the Nationalists gaining the support they would need to triumph in the civil war Once in power however the Communists faced the difficult task of learning how to rule Saich examines the devastating economic consequences of Mao s Great Leap Forward and the political chaos of the Cultural Revolution as well as the party s rebound under Deng Xiaoping s reforms Leninist systems are thought to be rigid yet the Chinese Communist Party has proved adaptable From Rebel to Ruler shows that the party owes its endurance to its flexibility But is it nimble enough to realize Xi Jinping s China Dream Challenges are multiplying as the growing middle class makes new demands on the state and the ideological retreat from communism draws the party further from its revolutionary roots The legacy of the party may be secure but its future is anything but guaranteed

Many Possible Worlds Cameron Gordon,2023-05-08 This book provides a crosscutting interdisciplinary account of how the disintegrated global subsistence economy circa 1800 has transformed into a global complex delivering unprecedented levels of material production and consumption Applying major findings from economics history historiography and sociology as well as from anthropology psychology politics and environmental studies the analysis tracks the ways in which changes in society including social structures values and forces have changed individuals including conceptions of race gender and identity and vice versa These changes have simultaneously homogenised and diversified societies and individuals in distinct but sometimes contradictory ways opening up many possible worlds from an individual and group perspective Yet the scale and pace of change has also led to increasing existential challenges The narrative consists of 30 chapters organized into 10 subsets of 3 one chapter on a relevant core idea one chapter focused on historical narrative and titled after a representative year and one chapter on a relevant associated crosscutting theme Major regional and topical discussions are provided with special attention paid to business and organisational change and developing world scholarship Small discussion boxes focusing on illustrative cases and details are presented throughout the book The last chapter contains over arching conclusions

insights from leading scholars in the field this collection highlights the interconnectedness and transnationalism of upheavals and revolutions offering a new approach which integrates political social and cultural history Chapter 8 is available open access under a Creative Commons Attribution 4.0 International License via [Link springer.com](http://link.springer.com) Strategic Narratives Alister Miskimmon, Ben O'Loughlin, Laura Roselle, 2014-02-18 Communication is central to how we understand international affairs Political leaders diplomats and citizens recognize that communication shapes global politics This has only been amplified in a new media environment characterized by Internet access to information social media and the transformation of who can communicate and how Soft power public diplomacy 2.0 network power scholars and policymakers are concerned with understanding what is happening This book is the first to develop a systematic framework to understand how political actors seek to shape order through narrative projection in this new environment To explain the changing world order the rise of the BRICS the dilemmas of climate change poverty and terrorism the intractability of conflict the authors explore how actors form and project narratives and how third parties interpret and interact with these narratives The concept of strategic narrative draws together the most salient of international relations concepts including the links between power and ideas international and domestic and state and non state actors The book is anchored around four themes order actors uncertainty and contestation Through these Strategic Narratives shows both the possibilities and the limits of communication and power and makes an important contribution to theorizing and studying empirically contemporary international relations International Studies Association International Communication Best Book Award **Inside the Arab State** Mehran Kamrava, 2018-08-15 The 2011 Arab uprisings and their subsequent aftermath have thrown into question some of our long held assumptions about the foundational aspects of the Arab state While the regional and international consequences of the uprisings continue to unfold with great unpredictability their ramifications for the internal lives of the states in which they unfolded are just as dramatic and consequential States historically viewed as models of strength and stability have been shaken to their foundations Borders thought impenetrable have collapsed sovereignty and territoriality have been in flux This book examines some of the central questions facing observers and scholars of the Middle East concerning the nature of power and politics before and after 2011 in the Arab world The focus of the book revolves around the very nature of politics and the exercise of power in the Arab world conceptions of the state its functions and institutions its sources of legitimacy and basic notions underlying it such as sovereignty and nationalism Inside the Arab State adopts a multi disciplinary approach examining a broad range of political economic and social variables It begins with an examination of politics and more specifically political institutions in the Arab world from the 1950s on tracing the travail of states and the wounds they inflicted on society and on themselves along the way until the eruption of the 2011 uprisings The uprisings the states responses to them and efforts by political leaders to carve out for themselves means of legitimacy are also discussed as are the reasons for the emergence and rise of Daesh and the Islamic State Power I argue and increasingly narrow conceptions of

Politics of Hybrid Warfare Jakub Eberle, Jan Daniel, 2023-06-23 This is a first book long analysis showing how the notion of hybrid warfare was used to transform security policies and discourses in an EU NATO country Building on current debates in International Political Sociology Critical Security Studies and Critical Geopolitics it provides a novel account of how crisis geopolitics uncertainty and expertise are intertwined in the social construction of threats Based on extensive and original empirical research of large textual archive and elite interviews in the Czech Republic and Brussels the book shows how officials bureaucrats journalists activists and experts all participate in the reshaping of security in a new geopolitical environment Zooming on the case of Czechia and its specific Central European context it complements the predominantly Western centric studies of insecurity with an account of how the liminal position on an East West boundary influences security politics As a first study of its kind and scope it will be of interest to academics and students interested in Central European politics practices and discourses of hybrid warfare as well as critical approaches to security and geopolitics

[Social Movements](#)

Paul Almeida, 2019-03-05 *Social Movements* cleverly translates the art of collective action and mobilization by excluded groups to facilitate understanding social change from below. Students learn the core components of social movements: the theory and methods used to study them and the conditions under which they can lead to political and social transformation. This fully class-tested book is the first to be organized along the lines of the major subfields of social movement scholarship: framing, movement emergence, recruitment, and outcomes, to provide comprehensive coverage in a single core text. Features include use of real data collected in the U.S. and around the world; the emphasis on student learning outcomes; case studies that bring social movements to life; examples of cultural repertoires used by movements; flyers, pamphlets, event data on activist websites; illustrations by activist musicians to mobilize a group; topics such as immigrant rights, transnational movement for climate justice, Women's Marches, Fight for 15, Occupy Wall Street, Gun Violence, Black Lives Matter, and the mobilization of popular movements in the global South on issues of authoritarian rule and neoliberalism. With this book, students deepen their understanding of movement dynamics, methods of investigation, and dominant theoretical perspectives, all while being challenged to consider their own place in relation to social movements.

Radical Communications

Michael Tsangaris, 2021-11-08 *Radical Communications* explores unauthorized messages we see in the cities we live in and their impact on the construction of social reality. Michael Tsangaris treats the city as a text and examines the political slogans, graffiti, and street art of Athens as complex visual signs in an alternative communication system. He argues that the legitimacy, aesthetic value, and social acceptability of these expressions depend on the time, place, and social group or individual that interprets them. Finally, his analysis reveals the contradictory character of the contemporary city. It shows a city of social inequalities, cultural diversity, multinational encounters, conflicts between age groups, and political, economic, and epidemic crises; a city of one-dimensional thinking, apathy, and consumer fetishism; but also a city that aspires to the dream of a better society and holds utopian promise.

The Internet and Democracy in Global Perspective Bernard Grofman, Alexander H. Trechsel, Mark Franklin, 2014-07-08 This volume provides an important update to our current understanding of politics and the internet in a variety of new contexts, both geographically and institutionally. The subject of e-democracy has morphed over the years from speculative and optimistic accounts of a future heightened direct citizen involvement in political decision making and an increasingly withered state apparatus to more prosaic investigations of party and governmental website content and micro-level analyses of voters' online activities. Rather than levelling the communications and participation playing field, most studies concluded that existing patterns of bias and power distribution were being repeated online, with the one exception of a genuine change in the potential for protest and e-activism. Across all of these accounts, the question remains whether the internet is a levelling communication tool that elevates the profile of marginalised players in the political system or whether it is a medium that simply reinforces existing power and participatory biases. While employing case studies from various global perspectives, this book investigates the role of digital media and

competitive advantage campaigns and the effect of social media online communication as way of fomenting nonviolent revolutions and the undeniable and important role of the internet on democracy around the world
