Advances in DNA Damage and Repair Miral Dizdaroglu, Ali Esat Karakaya, 2012-12-06 Damage to DNA by both exogenous and endogenous sources is increasingly regarded as highly important in the initiation and progression of cancer and in the occurrence of other pathological events DNA damage caused by reactive oxygen derived species also called oxidative DNA damage is most the frequent type encountered by aerobic cells Mechanistic studies of carcinogenesis indicate an important role of this type of damage to DNA There is also strong evidence to support the role of oxidative DNA damage in the aging process DNA damage is opposed in vivo by repair systems If not repaired DNA damage may lead to detrimental biological consequences Therefore the repair of DNA damage is regarded as one of the essential events in all life forms In recent years the field of DNA repair has flourished due to new findings on DNA repair mechanisms and the molecular basis of cancer A detailed knowledge of mechanisms of DNA damage and repair and how individual repair enzymes function may lead to manipulation of DNA repair in cells and ultimately to an increase of the resistance of human cells to DNA damaging agents This volume covers the most recent developments in this research field and contains contributions from scientists working in the fields of biochemistry molecular biology enzymology biomedical science and radiation biology **Towards a Social Science of Drugs in Sport** Jason Mazanov, 2013-09-13 The debate around the role of drugs in sport is vibrant There is a wealth of evidence from the hard end of science telling us how drugs work how drug testing works and how many athletes have fallen foul of the system The evidence from social science is still building momentum For example what makes an athlete use a performance enhancing substance To win simply fails to explain the drug use behaviour we see among athletes This book provides a foundation for anyone trying to understand the drugs in sport problem beyond the hard science by looking at the people factor from different perspectives After building a case for the social science of drugs in sport it is examined from the ethical sociological economic legal and psychological points of view The book concludes with a definitive statement about what researchers policy makers sports administrators athletes and fans can do to achieve a social science of drugs in sport that puts people firmly in the centre of the debate This volume was published as a special issue of Sport in Society **Behavior Modification** Garry Martin, Joseph J. Pear, 2015-10-02 Behavior Modification 10 e assumes no specific prior knowledge about psychology or behavior modification on the part of the reader The authors begin with basic principles and procedures of behavior modification and then provide readers with how to skills such as observing and recording Next the authors provide advanced discussion and references to acquaint readers with some of the empirical and theoretical underpinnings of the field Readers will emerge with a thorough understanding of behavior modification in a wide variety of populations and settings Science and Development of Muscular Strength Timothy J. America from Colonial Times to the Twenty-First Century: An Encyclopedia Steven A. Riess, 2015-03-26. A unique new reference work, this encyclopedia presents a social, cultural, and economic history of American sports from hunting, bowling, and skating in the sixteenth century to televised professional sports and the X Games today. Nearly 400 articles examine historical and cultural aspects of leagues, teams, institutions, major competitions, the media, and other related industries, as well as legal and social issues, economic factors, ethnic and racial participation, and the growth of institutions and venues. Also included are biographical entries on notable individuals, not just outstanding athletes but owners and promoters, journalists, and broadcasters, and innovators of other kinds, along with in-depth entries on the history of major and minor sports from air racing and archery to wrestling and yachting. A detailed chronology, master bibliography, and directory of institutions, organizations, and governing bodies, plus more than 100 vintage and contemporary photographs, round out the coverage.
