Asian Medicine and Globalization Joseph S. Alter, 2013-03-26 Medical systems function in specific cultural contexts It is common to speak of the medicine of China Japan India and other nation states Yet almost all formalized medical systems claim universal applicability and thus are ready to cross the cultural boundaries that contain them There is a critical tension in theory and practice in the ways regional medical systems are conceptualized as nationalistic or inherently transnational This volume is concerned with questions and problems created by the friction between nationalism and transnationalism at a time when globalization has greatly complicated the notion of cultural political and economic boundedness Offering a range of perspectives the contributors address questions such as How do states concern themselves with the modernization of traditional medicine How does the global hegemony of science enable the nationalist articulation of alternative medicine How do global discourses of science and new age spirituality facilitate the transnationalization of Asian medicine As more and more Asian medical practices cross boundaries into Western culture through the popularity of yoga and herbalism and as Western medicine finds its way east these systems of meaning become inextricably interrelated These essays consider the larger implications of transmissions between cultures
