- 7 Configure the connectivity and web host for the system.

Set the secondary apparatus for the application (see options below), replace the front cover, and apply power to the system. Keep watching after the LED stops flashing (see the LED operation section). Watch through the detection zone, observing the sensor's LED whenever motion is detected. The red LED shows that a beam has been broken.

The broader range of all PBL units is subject to variation because of different types of ceiling, backgrounds, and ambient temperature. For this reason, ensure that the most likely outdoor conditions are well within the PBL's design range and that each building is covered but also has some shade.

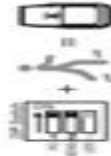

Note: This is the recommended setting for applications with jobs up to 100,000 records. For applications with more than 100,000 records, a more aggressive setting will be used to allow you to tune the system for a more aggressive environment.

Note: This is the recommended setting for applications with a large number of users. It is not recommended for applications with a small number of users.

Low Sensitivity and False Count is

High Sensitivity - 1.5 Steps
(High Sensitivity and Pulse Count 1)

Note: For High Security applications, use the High Security lens, double the LED U_{10} value, and set the sensitivity to High 631 and 632=650.
