

Science Writing Checklist (by D. Zuckerman with help from E. Lyman and A. Mamonov, Jan 2010)

Your co-authors (and/or research supervisor) may not want to see your draft unless ...

General

- ☐ Does each paragraph focus on a single idea or point which is introduced/summarized in the paragraph's first sentence? A paragraph is like a mini-essay.
- ☐ Is the flow of logic clear from paragraph to paragraph? From your draft, you should be able to (re)write the outline of the paper – in fact, just from the first sentences of the paragraphs. Check this.
- ☐ Did you repeat key points in several sections to emphasize them?
- ☐ Did you spend a lot more time on logic and clarity than grammar and sentence structure? Nevertheless, avoid complicated sentences.

Abstract

- ☐ Does the abstract avoid distracting technical details?
- ☐ Is it clear from the abstract why the work is new and worthy of publication?

Introduction

- ☐ Did you clearly explain the reason why the work was done – the existing problems?
- ☐ Did you clearly and briefly explain what you did to make progress – what's new?
- ☐ Did you cite pertinent work done before? Even by people you may not like?
- ☐ Did you read the introductions of several related papers to be sure you explained the ideas properly and cited the important work?

Methods

- ☐ Did you remind your readers why a new/old method was used? You can write a mini-introduction for the Methods section.
- ☐ Did you provide enough information so a reader could exactly reproduce your results? The whole procedure should be outlined, even if some details must be found in other work or Supplemental Information.

Results

- ☐ Did you make sure the main results are not buried? Again, use mini-introductions.
- ☐ Did you save commentary and speculation for the Discussion section?

Discussion

- ☐ Did you clearly explain what's new, as compared to previous work?
- ☐ Did you avoid repeating information from the Results section?
- ☐ Did you admit the limitations of your work?
- ☐ Did you describe future applications, improvements, and generalizations?

Conclusions

- ☐ Could a reader in a rash read just the Conclusions and learn just about everything (including acronyms)?
- ☐ Did you avoid exaggeration and let the data speak for itself?
- ☐ Did you acknowledge everyone who helped, including funding agencies?

Figures

- ☐ Do figure titles describe the main point of each figure?
- ☐ Have you put labels/arrows in the graphic to minimize effort for the reader?

Design Research in Information Systems Alan Hevner,Samir Chatterjee,2010-06-14 It is 5 years since the publication of the seminal paper on Design Science in Information Systems Research by Hevner March Park and Ram in MIS Quarterly and the initiation of the Information Technology and Systems department of the Communications of AIS These events in 2004 are markers in the move of design science to the forefront of information systems research A sufficient interval has elapsed since then to allow assessment of from where the field has come and where it should go Design science research and behavioral science research started as dual tracks when IS was a young field By the 1990s the influx of behavioral scientists started to dominate the number of design scientists and the field moved in that direction By the early 2000s design

people were having difficulty publishing in mainline IS journals and in being tenured in many universities. Yes, an annual Workshop on Information Technology and Systems (WITS) was established in 1991 in conjunction with the International Conference on Information Systems (ICIS) and grew each year. But that was the extent of design science recognition. Fortunately, a revival is underway. By 2009, when this foreword was written, the fourth DESRIST conference has been held and plans are afoot for the 2010 meeting. Design scientists regained respect and recognition in many venues where they previously had little.

From Struggling Students to Successful Writers in 7 Easy Steps Joanna Posey, 2009-09. This volume is the first of 2 volumes that are being released together but under separate covers. Volume 1 contains the instructional guide to teach special education students and English language learners to be successful writers in 7 easy steps. In view of the increasing educational dropout rate of these special populations, this unique, simple program offers encouragement, hope, and success to students who are struggling in developing their writing skills. Not only is this program easy to learn and remember, but students are able to increase their writing skills in shorter periods of time. This volume contains five no-frills, bare-bones lesson plans along with teacher comments. It also includes reproducible Master Guide Sheets and student self-evaluation forms. The simplified color-coding system is used as a consistent, predictable routine in each writing activity. This program, like no other, promotes student self-confidence and renewed interest in learning. The words "I can't write" turn into "Yes, I can." However, the best-kept secret is that these 7 easy steps will help all students. Listen to what the kids are saying: "I had a lot of fun with Steps 1 to 7. They really helped me with my work." Comments from an 8th grade student: "The first thing I learned was Steps 1-7. I learned how to write better paragraphs." Comments from an 8th grade student: "I learned how to web my ideas using complete sentences." Comments from an 8th grade student: "I did really well on my writing assessment because I used the 7 steps." Comments from a 9th grade student: "I couldn't write a complete sentence. With these steps, I can write complete paragraphs and essays for Language Arts and Geography. I did well in my writing test too." Comments from a 9th grade student: "Listen to what teachers are saying. I have been in meetings where parents have commented how effective her writing program has been with helping their kids. I've often heard parents express their gratitude for their child's success due to Ms. Posey's teaching." Comments from a junior high teacher: "After the 9th graders took the writing assessment, several of the students commented on how good they felt about their writing abilities that were a direct result of the efforts of Ms. Posey." Comments from a junior high teacher: "Her strategies and writing techniques resulted in 50% improvement, an impressive increase in the scores of resource students for the 9th grade direct writing assessment. This is the highest achievement I've seen in my 30 years of teaching." Comments from a secondary special education teacher: [Reading and Writing Across Content Areas](#) Roberta L.
