Negative Monetary Policy Rates and Portfolio Rebalancing: Evidence from Credit Register Data Margherita Bottero, Ms. Camelia Minoiu, José-Luis Peydro, Andrea Polo, Mr. Andrea F. Presbitero, Enrico Sette, 2019-02-28 We study negative interest rate policy (NIRP) exploiting ECB's NIRP introduction and administrative data from Italy severely hit by the Eurozone crisis. NIRP has expansionary effects on credit supply and hence the real economy through a portfolio rebalancing channel. NIRP affects banks with higher ex ante net short term interbank positions or more broadly more liquid balance sheets not with higher retail deposits. NIRP affected banks rebalance their portfolios from liquid assets to credit especially to riskier and smaller firms and cut loan rates inducing sizable real effects. By shifting the entire yield curve downwards, NIRP differs from rate cuts just above the ZLB.

Applied Health Economics for Public Health Practice and Research Rhiannon Tudor Edwards, Emma McIntosh, 2019-03-20 In today's world of scarce resources, determining the optimal allocation of funds to preventive health care interventions (PHIs) is a challenge. The upfront investments needed must be viewed as long-term projects, the benefits of which we will experience in the future. The long-term positive change to PHIs from economic investment can be seen across multiple sectors such as health care, education, employment, and beyond. *Applied Health Economics for Public Health Practice and Research* is the fifth in the series of *Handbooks in Health Economic Evaluation*. It presents new research on health economics methodology and application to the evaluation of public health interventions. Looking at traditional as well as novel methods of economic evaluation, the book covers the history of economics of public health and the economic rationale for government investment in prevention. In addition, it looks at principles of health economics, evidence synthesis, key methods of economic evaluation with accompanying case studies, and much more. Looking to the future, *Applied Health Economics for Public Health Practice and Research* presents priorities for research in the field of public health economics. It acknowledges the role played by natural environment in promoting better health and the place of genetics, environment, and socioeconomic status in determining population health. Ideal for health economists, public health researchers, local government workers, health care professionals, and those responsible for health policy development, *Applied Health Economics for Public Health Practice and Research* is an important contribution to the economic discussion of public health and resource allocation.
