

Methodology

A team of researchers from WIDE World, the online professional development program at Harvard Graduate School of Education guided this study. In September 2008, they outlined goals and a proposed process for the study and described the work that participating organizations would undertake. Long-term clients of the online professional development program were invited to submit an expression of interest, including a commitment by a local researcher/liaison. Eight organizations submitted the initial proposal and sustained their commitment throughout the ten-month study: three schools in Australia, two schools in Singapore, a group of three schools in New York City, an educational development organization in Jordan working with a network of innovative schools, and a program sponsored by the Kentucky Department of Education.

The WIDE World research team developed online environments to help guide and coordinate the study. They used their organization's online course platform as a means for collaboratively planning and discussing the research with case study participants. This platform included a threaded discussion area where participants exchanged ideas and puzzles through each phase of the research. The university team also developed a wiki where each participant had space to assemble and post interim reports, a final report, and related materials about their own case study. The wiki also included a site for participants to discuss and critique the evolving Systemic Educational Improvement Model.

The study used mixed methods to analyze the process and effects of the online professional development program and its educational frameworks in the schools. The local researcher in each case study site conducted follow-up surveys with teachers who had participated in the online courses, held individual and focus-group interviews with teachers and leaders, surveyed students, and collected teacher portfolios, including lesson plans, examples of student work, and classroom observations. Some of these research instruments had been tested in previous evaluations of the professional development program; others were developed specifically for this study.

Most research instruments—interview and focus group guides, observation protocols, surveys of teachers and students-- were proposed by the WIDE World researchers. However, local researchers at each site collaborated online in developing and refining the tools and analysis strategies that best suited their own action research needs and contexts.

Data sources

A total of 251 teachers, 24 leaders and 969 students from three schools in Australia, five schools in Jordan, two schools in Singapore, six schools in Kentucky and three schools in New York City took part in the study. At each research site, data sources included interviews, teacher and student surveys, teacher portfolios and observations, along with artifacts of student, teacher, leader and organizational work. Analyses were guided by the Systemic Educational Improvement Model, which was elaborated into a code book to

Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation's future depends Copublished with the Russell Sage Foundation ERDA Energy Research Abstracts United States.
