Luca Maria Aiello, Daniel McFarland, 2015-02-27. This book constitutes the proceedings of the Workshops held at the International Conference on Social Informatics SocInfo 2014 which took place in Barcelona, Spain, in November 2014. This book analyzes different figurations of childhood in contemporary culture and politics with a particular focus on interdisciplinary methodologies of critical childhood studies. It argues that while the figure of the child has been traditionally located at the peripheries of academic disciplines, perhaps most notably in history, sociology, and literature, the proposed critical discussions of the ideological, symbolic, and affective roles that children play in contemporary societies suggest that they are often the locus of larger societal crises, collective psychic tensions, and unspoken prohibitions and taboos. As such, this book brings into focus the prejudices against childhood embedded in our standard approaches to organizing knowledge and asks: is there a natural disciplinary home for the study of childhood? Or is this field fundamentally interdisciplinary, peripheral, or problematic to notions of disciplinary identity? In this respect, does childhood force innovation in thinking about disciplinarity? For instance, how does the analysis of childhood affect how we think about methodology? What role do understandings of childhood play in delimiting how we conceive of our society, our future, and ourselves? How does thinking about childhood affect how we think about culture, history, and politics? This book brings together researchers working broadly in critical child studies but from various disciplines in the humanities and social sciences, including philosophy, literary studies, sociology, cultural studies, and history, in order to stage a conversation between these diverse perspectives on the disciplinary or interdisciplinary character of the child as an object of research. Such conversation builds on the assumption that childhood, far from being marginal, is a topic that is hidden in plain sight. That is to say, while the child is always a presence in culture, history, literature, and philosophy, and is often even a highly charged figure within those fields, its operation and effects are rarely theoretically scrutinized but rather are more likely drawn upon surreptitiously for another purpose. *The General Knowledge*
