century supporters of the union of learning and labor to the interconnected histories of CMTS New Jersey's Manual Training and Industrial School for Colored Youth North Dakota's Normal and Industrial School and related programs elsewhere Goddard analyzes the work of movement figures like abolitionist Theodore Weld educators Calvin Woodward and Booker T Washington social critic W E B Du Bois Dewey himself and his influential Chicago colleague Ella Flagg Young The book contrasts ideas about manual training held by advocate Nicholas Murray Butler with those of opponent William Torrey Harris and considers overlooked connections between industrial education and the Arts and Crafts Movement An absorbing merger of history and storytelling *Learning for Work* looks at the people who shaped industrial education while offering a provocative vision of realizing its potential today *Resources in Education* ,2000-04 *Air Force Manual* United States. Department of the Air Force, *Work, Subjectivity and Learning* Stephen Billett,Tara Fenwick,Margaret Somerville,2007-06-03 In recent year efforts to understand learning for and throughout working life have moved away from a focus on workplace training to concerns about learning as a component and outcome of engaging in work and work related activities and interactions This shift acknowledges a broader set of workplace factors that shape workers learning and development Yet equally it acknowledges that this learning through engagement is also necessarily shaped by the diverse ways that individuals elect to engage or participate in workplace activities Central here is the issue of individuals subjectivity and how this is shaped by but shapes engagement in work and therefore what learning flows from their participation It is in considering the relations among subjectivity learning and work that it is possible to advance both the conceptual and procedural bases for understanding learning through and for working life Moreover the focus on relations among subjectivity work and learning represents a point of convergence for diverse disciplinary traditions and practices that are provided by the book's contributors In this way the contributions represent something of the emerging perspectives that are elaborating the complex relations among subjectivity work and learning and circumstances in which they are played out
