Privatizing Water Karen Bakker,2013-02-15 Water supply privatization was emblematic of the neoliberal turn in development policy in the 1990s Proponents argued that the private sector could provide better services at lower costs than governments opponents questioned the risks involved in delegating control over a life sustaining resource to for profit companies Private sector activity was most concentrated and contested in large cities in developing countries where the widespread lack of access to networked water supplies was characterized as a global crisis In Privatizing Water Karen Bakker focuses on three questions Why did privatization emerge as a preferred alternative for managing urban water supply Can privatization fulfill its proponents expectations particularly with respect to water supply to the urban poor And given the apparent shortcomings of both privatization and conventional approaches to government provision what are the alternatives In answering these questions Bakker engages with broader debates over the role of the private sector in development the role of urban communities in the provision of public services and the governance of public goods She introduces the concept of governance failure as a means of exploring the limitations facing both private companies and governments Critically examining a range of issues including the transnational struggle over the human right to water the commons as a water supply management strategy and the environmental dimensions of water privatization Privatizing Water is a balanced exploration of a critical issue that affects billions of people around the world *Concepts and Controversies in Tidal Marsh Ecology* M.P. Weinstein,Daniel A. Kreeger,2007-05-08 In 1968 when I forsook horticulture and plant physiology to try with the help of Sea Grant funds wetland ecology it didn t take long to discover a slim volume published in 1959 by the University of Georgia and edited by R A Ragotzkie L R Pomeroy J M Teal and D C Scott entitled Proceedings of the Salt Marsh

Conference held in 1958 at the Marine Institute Sapelo Island Ga Now forty years later the Sapelo Island conference has been the major intellectual impetus and another Sea Grant Program the major backer of another symposium the International Symposium Concepts and Controversies in Tidal Marsh Ecology This one re examines the ideas of that first conference ideas that stimulated four decades of research and led to major legislation in the United States to conserve coastal wetlands It is dedicated appropriately to two then young scientists Eugene P Odum and John M Teal whose inspiration has been the starting place for a generation of coastal wetland and estuarine research I do not mean to suggest that wetland research started at Sapelo Island In 1899 H C Cowles described successional processes in Lake Michigan freshwater marsh ponds There is a large and valuable early literature about northern bogs most of it from Europe and the former USSR although Evile Gorham and R L Lindeman made significant contributions to the American literature before 1960 V J
